# OUR NEW BRAND 2021

We create exceptional products for people who push themselves, break new ground and explore the unknown. They are visionaries in uncharted territory, beyond their comfort zone. By supporting them, deuter gives these people the freedom to pursue their passion for the mountains.

## DEUTER IS FOR TRAILBLAZERS

Over the last 120+ years, deuter has gone through many changes. From the beginning, we adopted a bold and innovative approach. Now, we are reshaping for the future with a new logo and brand design that speaks to trailblazers and mountain enthusiasts the world over – the mountaineers, the climbers, the skiers and boarders, and lovers of outdoor adventure.

## DEUTER IS FOR PERFECTIONISTS

As one of the earliest pioneers in mountaineering and expedition equipment, we have a wealth of experience to draw on. Throughout the design and testing process, we also rely heavily on the knowledge and expert opinions of the deuter Family, a select group of professional athletes. It's how we are able to perfect our products – products whose reliability and uncomplicated functionality make them ideal companions when exploring mountains and the natural world.

## DEUTER IS FOR FREETHINKERS

Our love of the extraordinary natural world and the experiences we share amongst it is what connects us all. These connections demand that we protect and preserve the environment we love for future generations. That is why we have done away with PFCs in our manufacturing processes, we use natural resources in a responsible way, and we ensure fair working conditions and animal welfare throughout the supply chain. To help us achieve this, we comply with the most stringent international standards and collaborate with partners that share our values. By focusing on quality, using durable materials and offering a lifelong repair service we are able to ensure that deuter products have the longest lifespan possible.

## DEUTER IS FOR SUMMITEERS

At deuter, we live and breathe mountain sports. Mountain athletes and adventurers, summiteers and all those drawn to high places – these are our inspiration. By pushing boundaries, testing possibilities and exceeding limits we harness every outdoor experience as a source for innovative ideas and product solutions – made by mountaineers, for mountaineers.

# 360°

## CORPORATE RESPONSIBILITY AT DEUTER

Social responsibility and environmental protection are deeply embedded in the deuter company ethos. It's part of who we are and guides our daily efforts.

360° means achieving sustainability from the very start of a product's life – from the recycled and sustainable materials, and the manufacturing of our high-quality products together with our established partners – right the way through to our repairs service.

We take a holistic approach to product development and are full accountable for our supply chain. We are supported along the way through our collaboration with sustainability initiatives and the application of recognized standards.

deuter has been a member of the Partnership for Sustainable Textiles since June 2015. The partnership is an initiative set up by the German government in October 2014. Its members from business and civil society, standards organisations and trade unions have set out to improve the social, environmental and economic conditions throughout the textile supply chain. For more information visit: [www.textilbuendnis.com](http://www.textilbuendnis.com)

### SOCIAL ENGAGEMENT AND PARTNERSHIPS

Fair Wear Foundation is an independent multi-stakeholder initiative that works together with brands and manufacturers. Its aim is to improve working conditions throughout the textile and apparel industry, especially locally, in manufacturing countries. deuter has been a member of the FWF since August 2011 and has committed to its strict working guidelines.

FWF has recognised this commitment and granted deuter 'Leader Status' for several years in a row.

- long-standing partnership with just two suppliers
- FWF Leader Status since 2013
- FWF Best Practice award 2015

### ECOLOGY & GOOD SUPPLY CHAINS

The bluesign® system is the world's strictest standard for environmental protection, occupational safety and consumer protection throughout the textile industry. As part of the bluesign® system partnership since 2008, we are actively working to make our products and the entire supply chain more resource-

efficient and environmentally friendly: from the design right through to delivery.

- 100 % T1-supplier (direct production partners) bluesign® system partners
- bluesign® products: ASTRO-series, Kikki, UP Series, Urban Belts

### ANIMAL WELFARE

To be Responsible Down Standard (RDS) certified, the entire supply chain must be fully traceable – from the chicks to the finished sleeping bag – and the strictest animal welfare standards upheld. And so,

to ensure that species-appropriate rearing procedures and animal welfare standards are sustained throughout our supply chain, since June 2015 we've exclusively used down and feathers from certified suppliers.

# PFC FREE

**COMPLETELY FREE FROM PFCS SINCE SPRING / SUMMER 2020**

**‘PFC free’ is everywhere. But what’s it all about? When Greenpeace launched its ‘Detox Outdoor’ campaign in 2017 it was a call to action for the textile industry to get rid of all harmful chemicals from their value chain. As one of the most harmful groups of chemicals, the main focus was on PFCs. But before we can appreciate their significance, it’s important to understand what the acronym PFC means.**

Perfluorinated and polyfluorinated compounds (PFC) are a group of more than 3000 synthetic chemicals that have both positive and negative characteristics. They are used in a host of everyday items: They are used to make waterproof membranes and water-repellent coatings on pots and pans, paper, for various technological applications and also for textiles. PFCs end up in the environment during the process of manufacturing, usage and disposal of these products - in particular in groundwater - and have therefore dispersed throughout the world. Scientists have found traces of PFCs in drinking water, air and a wide range of living organisms on all continents. Because PFCs bioaccumulate inside organisms and do not degrade over time, humans end up consuming them through food and drinking water. They have a negative effect on our hormone system and on fertility.

It is suspected that higher concentrations of some PFCs are even carcinogenic, which is why they are regulated in the EU by law. For our industry, with a business model that’s based on a love of the natural world, these findings have prompted a new approach. Which is why today, several PFC-free alternatives have been developed for membranes and waterproofing agents.

## WHY ARE PFCS USED?

PFCs have water, dirt and grease repellent properties and are highly stable. It was their durability and dependability that made them hard to beat for DWR (Durable Water Repellency) fabric treatments. But recently, things have changed. Alternatives like silicone or polymers are being used, which drastically reduce the environmental costs of both the production and the disposal of goods.

## OUR WATERPROOFING IS PFC FREE AND ENVIRONMENTALLY FRIENDLY

A few years ago, as part of our sustainability strategy, we decided to get rid of PFCs from all our products. The impetus for us, like many others in the industry, came from Greenpeace’s Detox campaign.

In order to maintain the high standards of water and dirt repellent performance of our products, we now use a waterproofing agent that is not harmful to our health or the environment. It is PFC free and is made according to the Zero Discharge of Hazardous Chemicals (ZDHC) regulations. It is also bluesign® approved, biodegradable and made using 60% renewable, plant-based raw materials. Which is how we are able to provide top-end performance, without it costing the earth.

For more information,  
visit our web pages:  
[www.deuter.com/responsibility](http://www.deuter.com/responsibility)

## LIFELONG REPAIR SERVICE

At deuter, we stand by the quality of our products and are committed to sustainability. This commitment starts with product development and does not, however, end with the sale of our products. That’s why we give our customers the ‘deuter Promise’ of worldwide, lifelong repairs to their much-loved gear.

## WHERE ARE DEUTER PRODUCTS MANUFACTURED?

It takes a lot of experience and skill to guarantee such high standards in quality and durability - and consequently a skilled team of experienced, driven employees. That’s why deuter only works with two long-standing manufacturing partners. All of our backpacks, bags and accessories are made in Vietnam, where our partner Duke, has exclusively manufactured for us, across three factories, since 1994. Bellmart, has manufactured all our sleeping bags since 2003. Bellmart makes our down sleeping bags in China, while our synthetic sleeping bags are made at its site in Myanmar.

For more information, visit our web  
pages: [www.deuter.com/promise](http://www.deuter.com/promise)

deuter has developed different systems specifically adapted to the various sports and their specific demands.

deuter  
AIRCOMFORT

HIKING / TREKKING

On small to medium backpacks that are at home in easier terrain we go for maximum ventilation. The heart of the Aircomfort systems – tested and proven for decades – is its flexible spring steel frame. It is extremely durable, provides stable tension for the airy back mesh and creates the ventilation space between pack and wearer's back for the moist, warm air to dissipate. 1984 deuter invented & patented the first mesh back system worldwide.

**THE RESULT:**

Up to 25 % less perspiration thanks to the maximum ventilation achieved by the Aircomfort mesh construction. This reduces circulatory stress for more endurance – tested and proven by the renowned Research Institute Hohenstein.

deuter  
AIRCONTACT

TREKKING / HIKING

The easiest way to carry heavy loads is when backpack and wearer become one. This is what our Aircontact principle is all about: the body contact system brings the weight close to the body and therefore close to the center of gravity. This results in full pack control and an effective load transfer. Furthermore, our Aircontact cushions made from special hollow chamber foam guarantee fantastic ventilation due to the pump effect of every movement.

**THE RESULT:**

Up to 15 % less perspiration as with a standard compact back system (proven in tests conducted by Gabriel L&T and the University of Erlangen) – combined with outstanding load transfer and a secure, perfectly balanced fit.

deuter  
AIRSTripES

BIKE / DAYPACK

A bike pack always has to sit secure and snug on your back – even on the roughest rides. Our unique Airstripes System takes care of that and offers effective ventilation. It consists of two contoured, air-channelled foam profiles that are covered with a highly breathable Wide AirMesh lining. The reduced contact surface results in an optimized fresh air circulation. Also, the pack's load is kept close to the body and thus won't throw the rider off balance.

**THE RESULT:**

The minimal contact surface area of the profiled Airstripes allows free air circulation over 80 % of the riders back, while still providing a secure, compact fit even on rough rides.

deuter  
ALPINE

ALPINE

For alpine backpacks the combination of comfort, durability, functionality and low weight is essential. deuter's Alpine System answers this challenge by focusing on a compact, secure yet comfortable fit with its two flexible softstripe back pads that are perfectly adapted to the anatomy and follow the wearer's movements. In combination with the pack's sleek shape this keeps the load always close to the centre of gravity – thus guaranteeing full pack control.

**THE RESULT:**

The Alpine back combines a secure, compact fit for full pack control and full focus on the terrain with a top carrying performance and a comfortable ventilation between the two softstripe back pads.

deuter  
LITE

HIKING / ALPINE

Our lightweight backpacks come into their own during endurance sports and Alpine day treks. Reduced to the essential, they are ideal for comfortably carrying light to medium loads depending on the volume. However, lightness must never come at the expense of durability. That is and always was our corporate philosophy, because disposable products put a strain on the environment and a backpack that falls apart high up in the mountains can also be dangerous.

**THE RESULT:**

Our lightweights are designed for everyone who wants to travel light without forgoing carrying comfort and durability.

deuter  
CONTACT

TRAVEL

The ergonomically shaped back cushions of the Contact System hug the back and distribute the weight of the load evenly, relieving the load on the back. Additionally, loads are carried easiest when they are close to the body. Channels between the cushions as well the breathable, sturdy 3D Airmesh lining provide pleasant ventilation.

**THE RESULT:**

Ergonomically shaped Contact back cushions provide carrying comfort that relieves the back while keeping the weight of the load close to the body and distributing it evenly.

# EL-SERIES

Extra Long Series

## SL-COLLECTION

### Female specific packs

#### DEUTER SL-Team

deuter's product development team for the women's specific SL line consists of female designers and top athletes from all disciplines / sports. It's almost an occupational habit that our experts can never stand still. Since 2006 they are always pushing forward - also when it comes to developing products.

Our rucksacks are designed to fit the average athletic build. However, since not everyone fits the norm it is likely that women's models will fit many male users perfectly well, and vice versa.

AC Lite EL

Futura 29 EL

Futura 34 EL

Futura Pro 42 EL

Trans Alpine 32 EL

Giga EL

#### SHORTER BACK

Women usually have a shorter back than men. Our SL carrying systems are adapted to the female anatomy and therefore shorter.

#### SLIM-CUT SHOULDER STRAPS

The SL shoulder straps have a distinct S-shape and all-round soft edges. In addition the straps become slimmer towards their ends. For a perfect fit around the shoulder area - no pinching or chaffing. The shoulder straps lie closer together and are adapted to slimmer female shoulders.

#### CONICAL HIP-FINS

The closed SL hip belt forms a cone to perfectly adapt to the female anatomy. The conical shape is the result of the the ends of the hipbelt coming together in an upward direction and the anatomically adapted design for the SL hip fins. The hip fins perfectly hug the female hips.

Standard Fit

#### THE DEUTER EXTRA LONG SERIES

Tall people can enjoy a perfect fit with our Extra Long EL-models! Taller sportsmen and -women between 1.85 - 2 m often have difficulty finding backpacks that fit their longer backs. Our favourite deuter backpack models are available to suit taller people with extended back lengths by 6-9 cm. Overall, backpacks in the Extra Long (EL) series have also grown in terms of volume. Back systems, features and details remain the same in the EL models as they are in the standard models, however.

AIRCONTACT PRO

# CLIMBING

# GRAVITY SERIES PITCH

## SUSTAINABLE

Manufactured in an environmentally sustainable way: The main fabric is bluesign®-certified, which means that the entire process by which it is made is sustainable. And just like all of deuter's products, the Gravity Pitch is also free from PFCs.

## Details Gravity Pitch:

For alpinists on multi-pitch routes, where weight is at a premium and a secure fit and freedom of movement are key.

lightweight

adjustable sternum strap with whistle buckle

SOS label

deuter Lite back system

docking loops for helmet holder (sold separately)

stretch inner compartment

hydration compatible (2 l)

- zipper cellphone pocket at the side
- large zipper front pocket with key clip for topos etc.
- adjustable, ergonomic shoulder straps with gear loops

- gear loops on the front and top for rope attachment
- materials: 140D PA RIPSTOP HT FD, 600D PES bluesign®-certified

## LITE SYSTEM

deuter  
LITE

## EASY TO CARRY

This pack is lightweight and benefits from the deuter Lite back system, which is pared down to the essentials.

## ROLL-UP FUNCTION

When not in use, the slender-shaped pack simply rolls up for storage taking up minimal space

GRAVITY PITCH

NEW

**Gravity Pitch 12**  
# 3362022  
9315 saffron-slateblue | 8209 corn-teal | 4332 tin-ink  
350 g | H 44 x W 24 x D 14 cm

GRAVITY PITCH

**HANDY AND SECURE**  
A cellphone can be securely  
stashed in the zipper side pocket  
with special attachment loop.

# GRAVITY SERIES MOTION

## HARD WEARING

Both the main fabric and special canvas panel on the front of the pack are hard wearing and durable.

## RECYCLED FABRIC

### SUSTAINABLE

Manufactured in an environmentally sustainable way: The fabrics are made entirely from recycled materials. And just like all of deuter's products, the Gravity Motion is also free from PFCs.

## Details Gravity Motion:

deuter Contact back system: comfortable, padded back panel

adjustable sternum strap

valuables pocket inside

- zipper opening on the back: easy to load when fully opened along the full length of the back
- practical grab handle on the back
- two internal gear loops for quickdraws etc.
- gear loops on the front and base: for attaching a down jacket, sleep mat etc. to the front of the pack

- two large zipper side pockets for stashing rock shoes, first aid kit etc.
- rope strap on top
- main material recycled
- materials: 600D PES TPU bluesign®-certified, 330D TEXTURED REC PA

## CONTACT SYSTEM

deuter  
CONTACT

## MORE SPACE

Large capacity to accommodate all your climbing gear.

Climbing

RECYCLED FABRIC

NEW

**Gravity Motion SL (40 L)**  
# 3362322  
5609 aubergine-clay | 2275 jade-ivy  
780 g | H 58 x W 35 x D 24 cm

RECYCLED FABRIC

NEW

**Gravity Motion (40 L)**  
# 3362422  
6315 clay-arctic | 5429 redwood-graphite  
790 g | H 58 x W 35 x D 24 cm

**EASY LOADING**

A large zipper opening that runs the full length of the back makes access to gear and loading easy.

Climbing

**CLEVER STOW OPTIONS**

Straps and metal hooks on the outside of the pack and under the lid are designed to stash a rope or jacket, leaving more space inside the pack for the rest of your gear.

# GRAVITY SERIES EXPEDITION

## Details Gravity Expedition:

For ambitious mountaineers looking for an ultra-light, versatile, large-capacity expedition pack.

lightweight

deuter Lite back system

removable Delrin® U-frame

ultra-light hips fins

stabilizer straps

adjustable sternum strap with whistle buckle

hydration compatible (3 L)

two ice axe attachments

detachable, height-adjustable lid with roomy lid pocket

SOS label

stretch inner compartment

docking loops for helmet holder (sold separately)

- ultra-light hips fins with one gear loop, ice clipper slot and zipper pocket
- large side pocket for drinks bottle
- gear loops
- side compression straps can be combined at the front to attach gear
- reinforced base
- materials: 140D PA RIPSTOP HT FD, 600D PES bluesign®-certified

## LITE SYSTEM

deuter  
LITE

### LIGHTWEIGHT CARRY COMFORT

This versatile, lightweight backpack is comfortable to carry even in the most extreme conditions. The deuter Lite back system is stripped down to the essentials yet capable of carrying heavy loads in comfort.

### WEIGHT SAVING

The sophisticated design and lightweight materials, like a lightweight Delrin® U-shaped frame that can be removed via a simple Velcro flap, all help to reduce weight. And to shed even more weight, you can leave the detachable lid back at base camp.

# GRAVITY SERIES WALL BAG 50

## Details Gravity Wall Bag:

For climbers and trailblazers looking for a haul bag/ backpack combo with a comfortable back system.

flexi spring steel frame

Pull-Forward adjustment enables the wearer to tighten and adjust the compact hip fins easily even with heavy loads

stabilizer straps

adjustable sternum strap with whistle buckle

additional zipper opening on the back for quick access

SOS label

zipper front pocket with built-in key clip

- the back system zip cover doubles as a rain cover and backpack lid, with a strap and hook closure
- large base with crossover straps for attaching gear
- fixed drawcord lock and gripper loops for ease of use
- gear loops
- zipper front pocket with built-in key clip

- three internal gear loops
- hard-wearing canvas
- materials: 840D PA TARPAULINE, 210D PA OXFORD bluesign®-certified, with TPU coating on both sides to protect inside and outside of the pack

## ALPINE SYSTEM

deuter  
ALPINE

### EASY TO CARRY OR HAUL

With both a backpack and haul bag function for practical ease. The deuter Alpine back system creates a snug, secure fit on the back. A zipper opening down the length of the back system allows easy access to your gear.

### CLIMBING FUNCTIONALITY

The haul system makes light work of big walls. When used as a haul bag, the comfortable carry system has a built-in, stowable cover that also serves as a rain cover. This makes hauling your gear up the rockface a smooth process. Compression on the main opening also gives the bag a cylindrical shape to prevent any snagging. Asymmetrical haul loops make it easy to transfer the load on the wall.

GRAVITY WALL BAG

NEW

**Gravity Wall Bag 50**  
 #3362522  
 6315 clay-arctic  
 1740 g | H 70 x W 33 x D 27 cm

**QUICK ACCESS**

A zipper front pocket with built-in key clip provides quick access to your cellphone etc.

**HARD WEARING**

The hard wearing, water resistant and tear resistant canvas of the Wall Bag can withstand rough, broken rock and helps protect contents too.

# 3300122  
1348 marine-ink | 8209 corn-teal  
1180 g | H 64 x W 30 x D 22 cm

**MODULAR ATTACHMENT**

There are various options to attach skis, a snowboard or crampons onto the outside of the pack using the two dedicated modular gear straps.

**FREESCAPE LITE**

**SECURE**

A cellphone can be securely stashed in the zipper side pocket. It is also easy to access in an emergency. Keeping your phone separate from your avalanche beacon also means you'll avoid any signal interference.

**QUICK ACCESS**

A secondary zipper opening at the side provides easy access to contents.

**FULLY FEATURED**

Includes clever features like a built-in, detachable mesh helmet holder that's easy to attach to the front of the pack or stash. A dedicated, reinforced avalanche equipment compartment on the front provides plenty of space for safety equipment, and with a wide-aperture opening, provides quick access in an emergency. There is a zipper hanging pocket with fleece lining inside the pack to stow your goggles.

NEW

# FREESCAPE PRO SERIES

RECYCLED FABRIC

**SUSTAINABLE**  
Manufactured in an environmentally sustainable way: The main fabric is 100% recycled and bluesign®-certified, which means that the entire process by which it is made is sustainable. And just like all of deuter's products, the Freescape Pro is also free from PFCs.

**Details Freescape Pro:**  
38+ SL, 40+

ALPINE SYSTEM

deuter  
ALPINE

CARRY COMFORT AND EASY HANDLING

The deuter Alpine back system keeps the load close to the body's center of gravity for a comfortable, secure and effortless carry. A secondary zipper opening on the back makes contents easy to access while leaving skis, a snowboard or crampons attached to the front of the pack. The U-shaped opening runs below the shoulder strap anchor points, so that none of the straps are in the way. Covered in snow-resistant fabric, the back system also stays dry when accessing contents via the back zipper.

SUSTAINABLE and resource-saving.

Our nylon is made from 100% recycled industrial waste and certified to recognised standards.

# KID CARRIER

KID COMFORT ACTIVE

**Kid Comfort Active SL**  
# 3620021  
3007 denim  
2650 g | H 70 x W 43 x D 34 cm

**Kid Comfort Active**  
# 3620121  
3003 midnight  
2680 g | H 70 x W 43 x D 34 cm

Details Kid Comfort Active:

**Kid Comfort Active:** For parents looking for a safe and light child carrier.  
**Kid Comfort Active SL:** For mothers that hold their own and want a child carrier that fits them extremely well. Slimmer SL-shoulder straps and conically shaped SL-hip fins are especially adapted to fit the female anatomy.

- light weight
- fast VariQuick back-length adjustment with large scope so both parents can comfortably carry the child
- ergonomically designed hipbelt
- hip belt is easy to adjust even with heavy loads via the Pull-Forward system construction

- load adjustment straps
- continuously adjustable chest strap
- large, elastic and ventilated mesh pocket under child's seat with fast draw-cord closure and hook; large, elastic front pocket
- pleasant ventilation through perforated shoulder straps
- height-adjustable child seat with varying cushion width according to age for a healthy sitting position
- height-adjustable foot rests with adjustment to fit the child's feet
- detachable, washable chin pad with removable cover
- children sweat less thanks to side mesh inserts to ventilate inside of seating area
- setting the child carrier down is easy with its base that has a noticeable lock function
- zipped pocket on one hip fin
- different cover materials in child's seating area: airy and soft in the comfort zone and robust and washable in the foot areas
- the sturdy aluminium frame with broad platform is tip-over resistant – very helpful when getting into the seat
- two grab handles
- larger pillow and sun roof available as accessories
- folds for transport
- key holder
- Material: 210D PA

## KID COMFORT | ACCESSORIES

**KC Sun Roof**  
# 3690021 | 4014 graphite  
160 g

### Kid Comfort Accessory

The flexible and durable sun roof is securely attached to the deuter child carrier with buckles. The sun roof protects the child from UV-rays and provides pleasant shade. Easy to stow thanks to its flexible construction.

Fits the Kid Comfort Active, Kid Comfort Active SL, Kid Comfort.

**KC Raincover Deluxe**  
# 3690121 | 2004 kiwi  
165 g

### Kid Comfort Accessory

The complete rain and wind protection for the child carriers. Fits all child carriers with a sun roof.

**KC Chin Pad**  
# 3690221 | 4003 grey  
150 g

### Kid Comfort Accessory

Our child carriers can be upgraded with the large, ergonomic pillow. It protects the tired child's head and gives support even in the corners of the cockpit, enabling a relaxing nap. The soft pillow and the removable cover are washable and easy to remove. The press-stud attachment fits all current Kid Comfort models.

**KC Foot Loops**  
# 3690321 | 4014 graphite

### Kid Comfort Accessory

The height-adjustable foot loops for our child carriers are also available separately. They are now adjustable to accommodate different foot and shoe sizes.

# AViANT DUFFEL PRO

bluesign®  
PRODUCT

RECYCLED FABRIC

**SUSTAINABLE**  
Our new duffel is a bluesign® product and manufactured to strict environmental and social standards, with minimal impact on people or planet - so you can enjoy an active life with a clear conscience. The packing case for the duffel is now even more sustainable too. Instead of using a separate bag, the duffel now folds down neatly and stows inside its own outer pocket. In addition, the outer fabric consists of 50% recycled materials.

**Details AViANT Duffel Pro:**  
40, 60, 90

For active adventure-lovers who need plenty of space for their gear and a robust, water-resistant means of transporting it - made in a sustainable way.

 stowable shoulder straps

# HERITAGE SERIES INNSBRUCK

bluesign®  
PRODUCT

RECYCLED FABRIC

## VERY SUSTAINABLE

Our entire Heritage series is sustainably made. The Innsbruck pack is a bluesign® product, manufactured to strict environmental and social standards, and with minimal impact on people or planet – so you can enjoy your day with a clear conscience. And just like all of deuter's products, the Innsbruck is also free from PFCs.

## Details Innsbruck:

For trend-savvy city dwellers looking for a backpack with good sustainability credentials and clever compartment design to keep them highly organized – in '70s style.

SL

DESIGNED FOR WOMEN

The shorter cut SL Women's Fit models feature a soft, cosy fleece lining in the hip zone and the foot box and are perfect for women up to 175 cm.

Details Astro Pro  
400, 600, 800, 1000

For mountaineers and trekkers looking for maximum insulation at minimal weight for extreme conditions.

Thermo Stretch Comfort seams inside: faster to warm up and comfortable to sleep in thanks to the liner that stretches up to 25 % across the width

ErgoFootPro: more sensitive foot zone is given extra space in 3D ergonomic footbox for superior insulation

ThermoHood contoured hood for a cosy head with down held securely within chambers

inside pocket

PowerBox waffle structure in the lower part of the bag keeps the down in place no matter how much movement

Dryzone: water repellent fabric with PU coating at the foot and head

draft collar

Trapezoidal chamber design prevents the formation of cold spots

- top heat-to-weight ratio and packing dimensions
- contrasting draw cord toggles for easy hood adjustment (even in the dark)
- 360° insulation
- compression sack: light-weight, lateral compression, easy-to-use
- storage sack included - protects the down and keeps it well aired
- 2-way zip
- anti-snap zip baffle

- bluesign® product
- RDS certified down
- PFC-free water and dirt repellent finish
- perfect for alpinists - both inside a tent under a starlit sky
- Filling: 650+ cuin / 90/ 10 Down RDS/ bluesign®  
Inner shell: 20D PA RIPSTOP  
Outer shell: 20D PA RIPSTOP + DWR

Details Astro Pro SL

- SL models are shorter in length and the shoulder and foot sections slightly narrower
- SL models have proportionally more down fill compared to REG models

**360° fill system  
for 360° warmth**

The top and bottom layers of a deuter sleeping bag are identical and contain the same amount. That's because we are aware that despite EN-norm tests assuming that a person will lie on their back, in reality, people move about in their sleep. By using our 360° fill system, we can guarantee our comfort ratings in all sleeping positions - and no more cold back!

## 100% RDS certified down: the Astro series

- No live plucking
- No forced feeding
- Traceability in the supply chain
- Animal welfare assured at all times
- Certified and controlled by accredited institutes worldwide

- anti-catch strip with extra reinforcement
- 2-way, centrally placed zip with easy handling for kids
- Filling: HIGH-LOFT HOLLOWFIBRE  
Lining: 50D PES  
Outer material: 70D PA

## INFINITI SERIES- MADE FROM REMNANTS

And with it, we've managed to cut down our carbon footprint even further. By taking remnants from our production we've developed versatile, sustainable products in what we call the Infiniti series. These bags and packs are made from lovely fabric remnants from the manufacture of existing deuter products.

For the Infiniti series, we use remnants fabric from our production line that is 100% functional. This surplus fabric, which would otherwise go to waste, is turned into a series of bags and packs, thereby reducing the ecological footprint of our production. There are variations between the individual products in terms of the way these fabrics are applied, the surface area that is used and their aesthetics. But all fabrics are tested for functionality to ensure the end product is of a consistently high standard. deuter is proud to support the 1 % for the Planet

nonprofit organization with sales of its Infiniti series. 1 % for the Planet supports businesses and individuals in giving back to the planet in the most impactful way possible by building strategic partnerships that connect funds with causes. By donating 10% of the buying price of the Infiniti series to 1% for the Planet, deuter is delighted to be supporting environmental projects throughout the world.

For more information about 1% for the Planet visit:

- skis can be attached diagonally or in an A-frame, tied together at the top
- a snowboard or snowshoes can simply be strapped to the front of the pack
- also useful for compression
- Modelle: Freerider, Freerider Pro, Freerider Lite, Freescape Lite, Freescape Pro

RAIN COVER | TRANSPORT COVER

**Rain Cover Mini (12-22 L)**  
# 3942021  
3013 coolblue | 8008 neon  
65 g | H 48 x W 42 x D 12 cm

**Rain Cover Square (20-32 L)**  
# 3942121  
3013 coolblue | 8008 neon  
70 g | H 50 x W 34 x D 24 cm

**Rain Cover I (20-35 L)**  
# 3942221  
3013 coolblue | 8008 neon  
85 g | H 60 x W 30 x D 26 cm

**Rain Cover II (30-50 L)**  
# 3942321  
3013 coolblue | 8008 neon  
90 g | H 69 x W 30 x D 27 cm

**Rain Cover III (45-90 L)**  
# 3942421  
3013 coolblue | 8008 neon  
130 g | H 97 x W 37 x D 30 cm

Details Rain Cover Allround

- outstanding protection from rain and water thanks to PU coating and taped seams
- luminescent colour for safety
- square form for daypacks
- Material: 70D PA

**Transport Cover (60-90 L)**  
# 3942521  
3000 cobalt  
450 g | H 95 x W 36 x D 34 cm

Details Transport Cover

- practical double function: protects the backpack on planes and buses and serves as a rain cover
- several grab handles for comfortable carrying

Trekking | Reise

- storage pouch
- ID window
- taped seams
- Material: 210D PA

**Flight Cover 60**  
# 3942621  
7000 black  
300 g | H 92 x W 48 cm

**Flight Cover 90**  
# 3942721  
7000 black  
330 g | H 118 x W 72 cm

Details Flight Cover

- light transport sleeve for protecting backpacks in-flight
- roll-top closure
- pack sack

Trekking | Reise

- Material: 210D PA

FIRST AID

**First Aid Kit Active**  
# 3970021  
9002 papaya  
160 g | H 9 x W 12 x D 5 cm

Details First Aid Kit Active

- practical first-aid bag complete with medically recommended basic content
- grab handle
- quick access to entire content thanks to all-round zip opening

Dayhike | Biking

- loop for hip belt attachment
- Material: 420D PA RIPSTOP

**First Aid Kit**  
# 3970121  
9002 papaya  
280 g | H 11 x W 18 x D 5 cm

Details First Aid Kit

- top basic content pursuant to medical recommendations
- includes bandages, tweezers and instructions for administering first aid to injured persons
- grab handle
- quick access to entire content thanks to all-round zip opening

Mountaineering | Hiking  
Biking | Travel

- fold-out storage
- emergency instructions
- loop for hip belt attachment
- Material: 420D PA RIPSTOP

**First Aid Kit Pro**  
# 3970221  
9002 papaya  
360 g | H 16 x W 18 x D 8 cm

Details First Aid Kit Pro

- comprehensive emergency package equipped pursuant to medical recommendations
- includes numerous bandages, tick remover, clothing scissors, tweezers and instructions on administering first aid to injured persons
- grab handle

Travel | Trekking | Family-  
and Grouptours

- free space for personal additions
- quick access to entire content thanks to all-round zip opening
- fold-out storage
- loop for hip belt attachment
- emergency instructions
- grab handle
- Material: 420D PA RIPSTOP

## BACKPACK MATERIAL

Our manufacturing process well as the quality of the textiles we use ensures the long-time durability and longevity of our products. The materials we use are adapted to their future use as backpack textiles and produced especially for deuter. Performance, deuter's standards, and their safety for consumers are regularly tested in labs and are therefore assured.

The majority of the raw material we use in our textiles is polyester (PES) and polyamide (PA). They handle well due to their properties and they are robust and tearproof. The outer fabrics we use, especially our rain covers, are water resistant. This provides ideal traits of products that are intensively used outside like our backpacks and sleeping bags.

All our textiles are coated on the inside, making the respective material more durable, more water repellent, and the seams more stable. The consistency and strength of this polyurethane coating (PU) varies depending on its future use. The outside of our textiles is treated with a DWR (Durable Water Repellent) coat to obtain a high level of water and dirt repellent properties. We only use PFC free finishings.

We use textiles in differing strengths to make sure our products fulfil their respective function. We state these in denier (D). This measurement unit is established in the outdoor market and has lead to comparability within our own collection. It goes back to the old French unit of weight also called denier. This means that 1D = 1 gramme per 9000 meters of yarn. The lower the number in front of the "D" the thinner the respective textile. Our unit therefore describes fabrics that range from very sturdy and durable to extremely light textiles.

However, the durability and strength of a textile cannot only be taken from its denier number. The weave, structure,

and application-oriented mix of raw materials also plays a role. The finishing of the yarn before the weaving process also has a decisive impact. We also state relevant equipment and features. Weaving in stronger threads or reinforced structures can make thinner material more durable and more stable. We call this feature "Ripstop" for example. If other processed or surface-finished yarns are used then the product is labelled with "high tenacity".

**YKK® zippers:** The most high-quality zippers available on the market are absolutely robust and reliable.

**Multi-chamber aluminium profile rails:** The weight-bearing elements of our backpacks are made from high-quality aluminium. This makes them durable and light at the same time. Its special constructions makes it possible to combine these two traits. A flat aluminium rail is separated into several different chambers by internal partitions. The cross sections shows a hive-like structure that provides stability. The multi-chamber aluminium profile rails are used in differing widths depending on the model of the backpack.

**Permanently elastic spring steel frames:** Spring steel is incredibly durable and elastic. It springs back into form again and again nearly unbreakable after being deformed. A round profile allows a very flexible construction of the frame. A flat profile provides a frame with extremely high form stability. Both give our Aircomfort models with its patented ventilation a permanently stable tension of the back net.

## SLEEPING BAG MATERIAL

Our upper materials and filling for sleeping bags are made of polyamide and also polyester for the most part. We predominantly process textiles with low deniers. These are also often structured. The fabrics are light and at the same time very durable and always moisture repellent. PFC free materials are increasingly being used. In addition we also make sure to use breathable materials to ensure pleasant sleeping conditions.

Fabric in the so-called Dryzones is especially processed and enables a high water column. The sleeping bag stays comfortably dry.

Our fillings are also light and comfortable. Good insulation properties and breathability are necessary requirements for the materials that we use in our products.

Some of our sleeping bags used brushed materials like the Brushed Thermo Fleece. The light and very high-quality polyester fleece feels soft and cozy to the skin due to its fluffy brushed surface. The material offers an excellent warmth-weight ration. Furthermore it is highly breathable, long-lasting, and easy to clean. Its short drying time is another benefit. Its high level of elasticity supports freedom of movement of

the Thermo-Stretch-Comfort-construction in our Exosphere SL models. It also keeps warm in the Orbit SL models.

## FILLING SLEEPING BAG

### Synthetic

**High-Loft Hollowfiber:** Synthetic hollow fibres are processed to a filling fleece (by thermal bonding). To ensure good compression and high loft, silicone is added. Remarkable insulation rating, tear resistant and durable.

**Thermo ProLoft®:** A special thermal process turns Polyester fibres into top quality technical Thermo ProLoft® insulating fleece. The combination of dense and hollow fibres results in the perfect blend between durability, weight and warmth properties - a fleece material that is easy care and durable yet compact and offers excellent insulation at minimal weight. The synthetic fibres also absorb very little moisture. Short drying times, excellent loft and thus insulation properties even when damp, are all advantageous characteristics. deuter Thermo ProLoft® is also coated with a thin layer of silicone to give it good lofting properties.

**Combining:** deuter sleeping bags Orbit, Exosphere and Space can be zipped together. Use left-hand zip and right-hand zip versions when combining.

### Down

Since June 2005 we only use down feathers certified in accordance with the Responsible Down Standard (RDS) - benefits: no live plucking, no force feeding, supply chain traceability, animal welfare guaranteed at every stage and verification by independent certification institutes around the world.

**Composition:** The deciding factor in a down sleeping bag is the down quality. Primarily this is a matter of the weight ratio of down to small feather mixture, which is expressed in percent. deuter uses only the high performance filling ratio of 90% down to 10% small feather (90/10).

**Fill power / cuin:** High quality sleeping bags should have a fill power of at least 650 cuin (cubic inches). This measurement in cubic inches per ounce of down shows the quality of the bulking and expansion power of the filling. High quality down has a bulking volume of 650 cuin (10.6 litres) per 1 ounce (28.3g). A bulking power of 550 cuin, and higher is good; of 650 - excellent; and 800 is almost impossible. In the end: the higher the volume the better the insulation value.
