WHAT'S NEW?

BREAKING NEW GROUND WITH INNOVATIVE PRODUCT SOLUTIONS

We've always used our customers' wishes as a source of inspiration. For more than 120 years we've successfully translated these into high quality, durable, sustainable products. This season,

we've again proven that the cornerstone of what we do is wear comfort combined with targeted functionality for product solutions that reach new target audiences.

NEW CAMERA BACKPACK SERIES - FOCUS ON COMFORT AND SUSTAINABILITY

The individual needs of photographers are as varied as the range of camera backpacks out there. Though the purpose, body size or camera equipment might call for different styles of product, they all share the same requirements for comfort, lightness, stability, durability, practicality and safety. And so, in collaboration with the renowned photographer and adventurer Michael Martin, we developed the Jaypack 34+ and the Futura Pro Jaypack 36 - two PFC-free backpacks that are made under fair working conditions, with hardwearing, water-resistant body fabric that's recycled and bluesign® certified. They not only comply with important environmental standards but are manufactured to the highest standards so they will last a long time too.

DEPENDABLY WATERPROOF - OUR NEW BIKE AND MOUNTAINEERING PRODUCTS

With the launch of the Plamort MTB backpack and the cleverly designed high-end bikepacking series Cabezon, we've added waterproof products to our bike range. The Vertrail and Durascent packs are two new and exciting families of waterproof packs for mountaineers who don't shy away from any mountain challenge and want to know that their gear is safe and dry, no matter what the weather. These waterproof products are made of durable materials (water column rating: 10,000 mm), have taped and welded seams and TPU-coated zippers to protect the pack's contents from rain and spray when used as intended. And we put them to the test under realistic conditions: In a ten-meter-tall rain tower, stormy weather conditions were simulated for two hours straight, with "rain" literally dumping on the packs at a rate of 450 l/m²/h.

We also used a variety of jets to simulate rain coming in from all sides. And our backpacks and bags reliably withstood even the worst conditions.

Durascent 30

Vertrail 16

FASZINATION GRAVELBIKE - NEUE SERIEN FÜR ROOKIES UND PROS

Versatility and complete freedom in route planning. Gravel bikes deliver it all - spreading a bit of the adventure bug as they go. Gravel bikes are the ideal companion for bikepacking, where you carry all of your luggage on your bike. That's exactly what Cabezon and Mondego - two easy-to-mount bike bag series - were designed for. Mondego offers practical, dependable gear for anyone who wants to give bikepacking a try. The two-piece construction of the Cabezon series handlebar and saddle packs are designed for globetrotters who want waterproof products that deliver smart design, ultra-light weight for easy handling, and a great ride every time.

From August 2022:
Alproof Lite, Alproof, Alpride System, Jaypack & Futura Jaypack

From March 2023: Vertrail, Guide, Durascent, Trail & Trail Pro, Shortrail

CSR „NEWS“

WE WANT TO PROTECT WHAT WE LOVE FOR FUTURE GENERATIONS

Which is why we incorporate responsibility toward our fellow humans and nature into our daily business practices. For years we've created innovative, durable, high-quality products with the aim of ensuring they have the longest possible lifespan. But there's no time for complacency. There's still a lot of work to do. Because sustainability is not a goal that can be achieved, but a process that needs constant reassessment and new approaches.

TAKING STEPS TOWARD GREATER SUSTAINABILITY.

TRUST AND PARTNERSHIP PAY OFF

The 14th annual German Sustainability Awards recognized exemplary global partnerships between companies from the textile industry based in Germany and in developing countries whose collaboration successfully fosters implementation of the 2030 Agenda for Sustainable Development and integrates accountability into their supply chains. The Sustainability Awards are the most coveted honor of this kind in Germany and Europe's largest prize for environmental and social action. This year, the German Sustainability Award was bestowed on our 30-year partnership with our Vietnamese partner Vina Duke – for our shared commitment to social and environmental responsibility and our leadership role in this area. This honor fills us with pride and lends us courage to push ahead with our sustainability efforts.

Sustainability Award
Global
Partnerships 2022

OUR PLEDGE

Business has to operate in harmony with people and the natural world. It's this basic sustainability principle that underpins our whole corporate philosophy. We call it 'Together for 360° Responsibility'. Together, we want to adopt responsible practices with the aim of preserving natural and man-made resources to make sure we tread as lightly as possible. But it takes more than a few token gestures to make this a reality. The deuter Promise is bigger than that.

Under the slogan „Changing for the better means taking responsibility” we have committed to clear, multidisciplinary measures with transparent, quantifiable goals and a holistic, all-encompassing approach to doing business sustainably. It may not be the easiest path. And it's certainly not the most direct one. But we're convinced that it will reap greater sustainability.

We've set ourselves fixed goals. And we are constantly driving them forward across all areas of the business. They incorporate all the key aspects: the environment and climate, animal welfare, social justice and social welfare - and of course, our customers.

WE TAKE OUR RESPONSIBILITY SERIOUSLY

At the heart of our sustainability strategy lies our responsibility for people and planet. Responsibility toward our customers and our employees means offering our customers durable, high-quality products and ensuring fair working conditions for our employees, who work hard to create these products. That responsibility reaches beyond our company to the society in which we live. And beyond that, to nature itself. The planet we live on is our only source of food, water, oxygen and precious resources. It also offers uniquely beautiful places that provide us all - not just outdoor enthusiasts - with a fascinating range of ecosystems and environments that energize and sustain us.

Responsibility is at the heart of everything we do and woven into the fabric of who we are.

TOGETHER WE ARE STRONGER

Each and every one of us has a part to play, a contribution to make. But together, we are greater than the sum of our parts. And that's why we work closely with our longstanding partners in manufacturing and design, recruit further partners with specialist skills and knowledge, and measure our efforts against the highest standards. Because sustainability isn't just a corporate vision, it's a philosophy that guides all our daily actions.

WE MANUFACTURE ACCORDING TO BLUESIGN® STANDARDS, TO PROTECT PEOPLE AND PLANET
Even the most conscientiously made outdoor equipment creates an ecological footprint. At deuter, we want to keep that footprint as small and light as possible. That's why we have adopted the bluesign® system – the world's strictest standard for environmental protection, occupational safety and consumer protection in the

textile industry – to guide us in our production. By using the bluesign® system, which deuter adopted in 2008, we aim to make our products and the entire production cycle progressively more resource efficient and more environmentally friendly. And we're improving all the time. 100% of the manufacturers that we work with are bluesign® system partners and the number of bluesign® products in our collection increases every season.

FAIRNESS FROM A TO Z – WITH THE FAIR WEAR FOUNDATION

We're celebrating a small anniversary – ten years' membership of the Fair Wear Foundation (FWF). It's a milestone in our efforts to achieve fair working conditions throughout the entire production and supply chain. The FWF is a multi-stakeholder initiative that works together with companies and

factories to improve working conditions in textile and garment factories, particularly on the ground in production countries. Recognition of our efforts, which include focusing on just two manufacturing partners, shows us we're on the right path. We've earned FWF Leader Status every year since 2013 and received the FWF Best Practice award in 2015.

PARTNERSHIP FOR SUSTAINABLE TEXTILES – UNITED FOR GREATER SUSTAINABILITY

We want to make outdoor equipment in an environmentally friendly, sustainable way, under fair conditions and within socially responsible manufacturing and supply chains. These chains are long and complex, and often hard for one company alone to clearly assess. That's why we have teamed up with other manufacturing partners and businesses

through our membership of the Bündnis für nachhaltige Textilien (Partnership for Sustainable Textiles). Our aim is to improve the social, environmental and economic conditions along the whole supply chain. The Partnership for Sustainable Textiles was set up in 2014 by the German government and brings together stakeholders from business, civil society, standards organizations and trade unions under one umbrella.

GREEN BUTTON FOR GREEN PRODUCTS

Policymakers have also recognized that textile manufacturing cannot become more sustainable without cross-border standards. deuter is collaborating with the international "Green Button" (Grüner Knopf) hallmark initiated by the German government. It is the world's first state-supervised certification mark

to establish compliance standards for sustainably produced textiles. This global seal of approval sets mandatory requirements to protect people and the environment. A total of 46 stringent social and environmental standards must be met, such as wastewater limits and the prohibition of forced labor.

RESPONSIBLE DOWN STANDARD – FOR THE LOVE OF ANIMALS

Even sustainable natural materials have to be produced in an environmentally sound way. That is why, since 2015, we've exclusively used high-quality feathers that are Responsible Down Standard (RDS)

certified for all of our down sleeping bags. In order to obtain RDS certification, animal welfare and farming practices have to be traceable throughout the entire production chain and meet the strictest requirements – from fledgling all the way through to finished sleeping bag.

SUSTAINABLE DEVELOPMENT GOALS

Can you imagine a world without poverty or famine? Fewer natural disasters and diminished impact from climate change? A world where humans and animals are less vulnerable? It's a worthwhile ambition, but one that's only possible if we all pull together. In 2015, member states of the United Nations ad-

opted the 2030 Agenda, which serves as a comprehensive roadmap to a peaceful, sustainable and prosperous world for us all. It's built around 17 Sustainable Development Goals (SDGs). We have joined this collective group and use the SDGs to guide us in shaping our 'deuter promise' agenda.

OUR OWN INITIATIVES

We are especially proud of the sustainability initiatives that we have undertaken ourselves and which we have already been successfully implementing for some time. These are further grist for the mill in realizing our vision and our holistic, fully integrated road to sustainable business practices.

WATERPROOFING THAT DOESN'T COST THE EARTH – PFC FREE SINCE 2020

Traces of PFCs are everywhere – in drinking water, breast milk, and the air we breathe – and they can even affect reproduction. These harmful fluorocarbons also degrade slowly, if at all, over time. They're a ticking time bomb for humans, animals and the environment. We have eliminated PFCs from our DWR (Durable Water Repellency) since the start of 2020, while still maintaining the highest performance in repelling dirt and water from our products. This new coating, which is environmentally friendly and not harmful to human or animal health, brings us one step closer to our goal of conducting our business more responsibly and sustainably.

MUTUAL TRUST IS GOOD. LONG-TERM COOPERATION IS EVEN BETTER.

Fair and cooperative partnerships and an understanding of the shared responsibility of all parties involved are the foundations for stable global supply chains. By using just two long-standing, trusted manufacturing partners we are able, on the one hand, to guarantee the high quality and durability of our products. And on the other hand, we are able to ensure that all parties adopt fair working conditions, and that manufacturing processes are sustainable and resource efficient. Duke, Vietnam, has exclusively manufactured all of our backpacks, bags and accessories for us since 1991. Our sleeping bags have been made in China and Myanmar by our partner Bellmart since 2013.

STITCHING UP OUR FUTURE – DEUTER'S REPAIR SERVICE

However well you look after a product, at some stage, it will start to show signs of wear and tear. For us, there is no doubt that mending gear is better than throwing it away. And that's not just because we have some real miracle workers in our repairs department, but because providing a lifetime repair service also increases the lifespan of a product, which in turn saves resources.

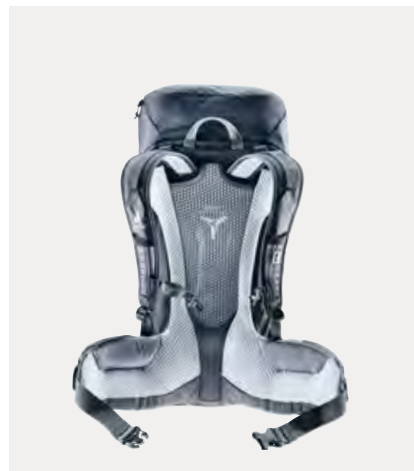

Find out more at:
www.deuter.com/responsibility

deuter has developed different systems specifically adapted to the various sports and their specific demands.

HIKING / TREKKING

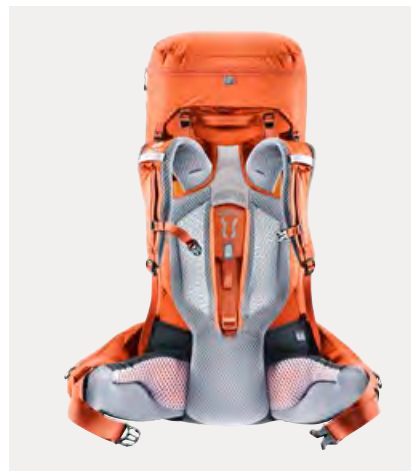

On small to medium backpacks that are at home in easier terrain we go for maximum ventilation. The heart of the Aircomfort systems – tested and proven for decades – is its flexible spring steel frame. It is extremely durable, provides stable tension for the airy back mesh and creates the ventilation space between pack and wearer's back for the moist, warm air to dissipate. 1984 deuter invented & patented the first mesh back system worldwide.

THE RESULT:
Up to 25 % less perspiration thanks to the maximum ventilation achieved by the Aircomfort mesh construction. This reduces circulatory stress for more endurance – tested and proven by the renowned Research Institute Hohenstein.

TREKKING / HIKING

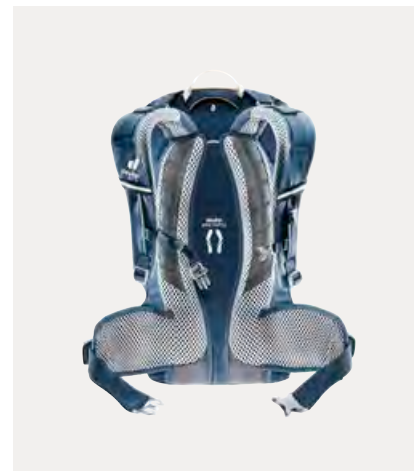

The easiest way to carry heavy loads is when backpack and wearer become one. This is what our Aircontact principle is all about: the body contact system brings the weight close to the body and therefore close to the center of gravity. This results in full pack control and an effective load transfer. Furthermore, our Aircontact cushions made from special hollow chamber foam guarantee fantastic ventilation due to the pump effect of every movement.

THE RESULT:
Up to 15 % less perspiration as with a standard compact back system (proven in tests conducted by Gabriel L&T and the University of Erlangen) – combined with outstanding load transfer and a secure, perfectly balanced fit.

BIKE / DAYPACK / HIKING

A bike pack always has to sit secure and snug on your back – even on the roughest rides. Our unique Airstripes System takes care of that and offers effective ventilation. It consists of two contoured, air-channelled foam profiles that are covered with a highly breathable Wide AirMesh lining. The reduced contact surface results in an optimized fresh air circulation. Also, the pack's load is kept close to the body and thus won't throw the rider off balance.

THE RESULT:
The minimal contact surface area of the profiled Airstripes allows free air circulation over 80 % of the riders back, while still providing a secure, compact fit even on rough rides.

ALPINE

For alpine backpacks the combination of comfort, durability, functionality and low weight is essential. deuter's Alpine System answers this challenge by focusing on a compact, secure yet comfortable fit with its two flexible softstripe back pads that are perfectly adapted to the anatomy and follow the wearer's movements. In combination with the pack's sleek shape this keeps the load always close to the centre of gravity – thus guaranteeing full pack control.

THE RESULT:
The Alpine back combines a secure, compact fit for full pack control and full focus on the terrain with a top carrying performance and a comfortable ventilation between the two softstripe back pads.

HIKING / ALPINE

Our lightweight backpacks come into their own during endurance sports and Alpine day treks. Reduced to the essential, they are ideal for comfortably carrying light to medium loads depending on the volume. However, lightness must never come at the expense of durability. That is and always was our corporate philosophy, because disposable products put a strain on the environment and a backpack that falls apart high up in the mountains can also be dangerous.

THE RESULT:
Our lightweights are designed for everyone who wants to travel light without forgoing carrying comfort and durability.

TRAVEL

The ergonomically shaped back cushions of the Contact System hug the back and distribute the weight of the load evenly, relieving the load on the back. Additionally, loads are carried easiest when they are close to the body. Channels between the cushions as well the breathable, sturdy 3D Airmesh lining provide pleasant ventilation.

THE RESULT:
Ergonomically shaped Contact back cushions provide carrying comfort that relieves the back while keeping the weight of the load close to the body and distributing it evenly.

EL-SERIES

Extra Long Series

SL-COLLECTION

Female specific packs

deuter SL-Team

deuter's product development team for the women's specific SL line consists of female designers and top athletes from all disciplines / sports. It's almost an occupational habit that our experts can never stand still. Since 2006 they are always pushing forward - also when it comes to developing products.

Our rucksacks are designed to fit the average athletic build. However, since not everyone fits the norm it is likely that women's models will fit many male users perfectly well, and vice versa.

AC Lite EL

Futura 29 EL

Futura 34 EL

Futura Pro 42 EL

Trans Alpine 32 EL

Attack 22 EL

Giga EL

SHORTER BACK

Women usually have a shorter back than men. Our SL carrying systems are adapted to the female anatomy and therefore shorter.

SLIM-CUT SHOULDER STRAPS

The SL shoulder straps have a distinct S-shape and all-round soft edges. In addition the straps become slimmer towards their ends. For a perfect fit around the shoulder area - no pinching or chaffing. The shoulder straps lie closer together and are adapted to slimmer female shoulders.

CONICAL HIP-FINS

The closed SL hip belt forms a cone to perfectly adapt to the female anatomy. The conical shape is the result of the the ends of the hipbelt coming together in an upward direction and the anatomically adapted design for the SL hip fins. The hip fins perfectly hug the female hips.

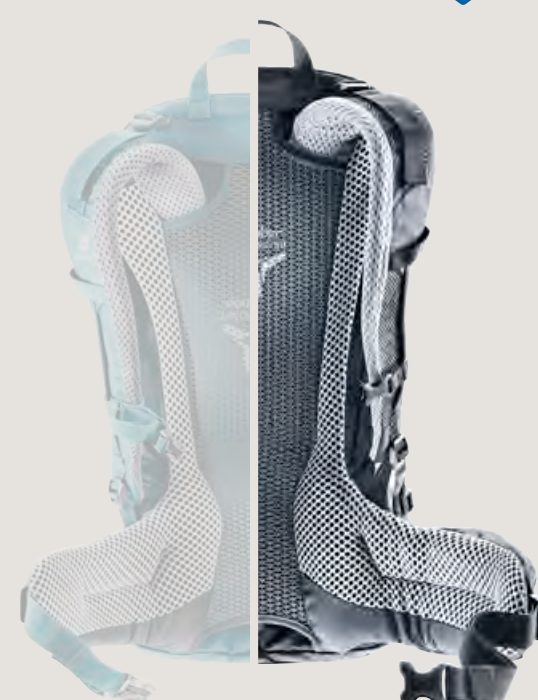

Standard Fit

THE DEUTER EXTRA LONG SERIES

Tall people can enjoy a perfect fit with our Extra Long EL-models! Taller sportsmen and -women between 1.85 - 2 m often have difficulty finding backpacks that fit their longer backs. Our favourite deuter backpack models are available to suit taller people with extended back lengths by 6-9 cm. Overall, backpacks in the Extra Long (EL) series have also grown in terms of volume. Back systems, features and details remain the same in the EL models as they are in the standard models, however.

Standard Fit

DRIVEN BY OUR CUSTOMER'S PASSION FOR THE OUTDOORS – FOR 125 YEARS AND COUNTING

As a mountain sports pioneer, Europe's largest backpack manufacturer, and an expert in sleeping bags, deuter has been shaping the international outdoor adventure scene for 125 years. And for just as long, we've been creating innovative, high-quality, durable products with the aim of always giving our customers exactly what they need to live their passion – in a sustainable package. It's important to us that we meet individual needs and continually challenge the status quo.

And so, over the years we've designed countless innovations that revolutionized the backpack market. For his first ascent of Nanga Parbat in 1953, Herman Buhl was very careful to select exactly those pieces of gear that he could depend on to withstand the extreme conditions and challenges of the expedition – and that included the deuter Tauern backpack that was developed back in 1930. 1984 saw what was arguably the biggest revolution: The first Aircomfort backpack with a mesh back caused deuter's competitors to sweat – because it spared mountaineers that very same discomfort. In 1990, when Trans-Alp pioneer Andi Heckmair needed a backpack to take on his journey across the Alps, he teamed up with us to make the first bike-specific backpack. In 1996, Bernd Kullmann developed a prototype for a baby carrier for his daughter. The deuter Kid Comfort delivers on its name's promise and was the first child carrier to be TÜV/GS-certified – and remained the only one for quite some time. Gerlinde Kaltenbrunner's quest for expedition gear that fit her body paved the way for today's SL models, which are designed specifically for women. We could go on, but today our goal isn't to list off every one of our accomplishments. It's to celebrate our shared passion with our retailers and our customers.

And for that, we're releasing the 125th anniversary edition of eight of our most popular models. They're made from 100% recycled (PA) and bluesign®-certified body material in black and printed with a special graphic that pays homage to the history of mountaineering and our desire to continue to shape the world of mountain sports with our innovations.

Out of passion for our customers. And out of a sense of responsibility to humanity and nature.

Here's to the next 125 years!

AIRSTripES SYSTEM

deuter
AIRSTripES

SUPERIOR VENTILATION FOR A DRY BACK
The reduced contact surface and large ventilation channels of the deuter Airstripes back system combined with perforated shoulder straps and hip fins ensure maximum airflow. The back system also distributes the pack's weight close to the body for a snug, secure fit over any terrain.

SAFE ON VIA FERRATAS
Loops on the shoulder straps keep the carabiners of the via ferrata set close at hand. That, combined with the backpack's compact, snug fit provides enhanced safety when climbing fixed-rope routes.

PRACTICAL FEATURES FOR FAST ACTION
Thanks to a large front zipper opening and elastic front stash pocket, equipment and gear are always readily at hand, yet compactly stowed.

 adjustable back length	 spacious lid pocket	 SOS label	
 pull-forward system for hip fin adjustment	 height-adjustable lid	 separate bottom compartment	

AIRCONTACT SYSTEM

ADJUSTABLE FOR COMFORT
The pack features VariQuick system, which enables quick and easy adjustment of the back length to the wearer.

SUPERIOR VENTILATION FOR A DRY BACK
The Aircontact Lite back, made of open-cell, hollow-chamber foam padding ensures good breathability and an excellent balance of comfort and light weight. It's ideal for efficient load transfer.

ERGONOMIC HIP FINS FOR BACK COMFORT
Compact, ergonomic ECL hip fins can be adjusted for stability and a custom fit for efficient load transfer. Special padding inserts hug the hips and provide stability and comfort. An additional cut-out along the back not only ensures ventilation but also reduces pressure on the spine.

DETACHABLE MESH HELMET HOLDER
FOR STABLE LOAD CONTROL

The detachable mesh helmet holder is integrated into the lid but can also be moved to the front of the pack, so the helmet can be attached to the top or the front of the pack depending on the terrain and the load. That makes for a more stable pack fit and load control.

EXCELLENT WEIGHT-TO-COMFORT RATIO FOR MORE ENERGY

We've taken a well-balanced selection of materials, optimized the tailoring, reduced materials use to a minimum, and pared the features down to the essentials. The result is an especially lightweight yet durable biking backpack that delivers a great weight-to-comfort ratio.

BIKE-SPECIFIC BACK SYSTEM FOR COMFORT AND STABILITY

The breathable Airstripes back system ensures good airflow across the back and a snug fit for technical trails. The sternum strap, which features a new one-hand buckle, and mesh hip fins hold the pack in perfect position - no matter how rough the ride.

RACE SERIES

RECYCLED FABRIC

RESOURCE-FRIENDLY MANUFACTURING

With bluesign®-certified body fabric made of 100% recycled materials and resource-saving components from 100% environmentally friendly production, the pack meets the highest standards. It's also climate neutral and PFC-free and is a clear statement of our commitment to sustainability.

RECYCLED FABRIC MARKETING STYLE

RESOURCE-FRIENDLY MANUFACTURING
With bluesign®-certified body fabric made of 100% recycled materials and resource-saving components from 100% environmentally friendly production, the pack meets the highest standards. It's also climate neutral and PFC-free and is a clear statement of our commitment to sustainability.

EXCELLENT WEIGHT-TO-COMFORT RATIO FOR MORE ENERGY

We've taken a well-balanced selection of materials, optimized the tailoring, reduced materials use to a minimum, and pared the features down to the essentials. The result is an especially light-weight yet durable biking backpack that delivers a great weight-to-comfort ratio.

SUPERIOR VENTILATION FOR A DRY BACK

The proven Aircomfort back system was designed specifically for biking. A mesh back panel that's split down the middle means that even less of the pack is in direct contact with the back. It also makes more room for a rounded spine in riding position. The airy mesh hip fins, perforated shoulder straps and back padding ensure maximum air flow, even on sweaty tours.

3003 midnight 3069 teal
4 046051 115528 4 046051 133966

Details Kid Comfort Active:

Kid Comfort Active: For parents looking for a safe and light child carrier.
Kid Comfort Active SL: For mothers that hold their own and want a child carrier that fits them extremely well. Slimmer SL-shoulder straps and conically shaped SL-hip fins are especially adapted to fit the female anatomy.

- light weight
- fast VariQuick back-length adjustment with large scope so both parents can comfortably carry the child
- ergonomically designed hipbelt
- hip belt is easy to adjust even with heavy loads via the Pull-Forward system construction

- load adjustment straps
- continuously adjustable chest strap
- large, elastic and ventilated mesh pocket under child's seat with fast draw-cord closure and hook; large, elastic front pocket
- pleasant ventilation through perforated shoulder straps
- height-adjustable child seat with varying cushion width according to age for a healthy sitting position
- height-adjustable foot rests with adjustment to fit the child's feet
- detachable, washable chin pad
- children sweat less thanks to side mesh inserts to ventilate inside of seating area
- setting the child carrier down is easy with its base that has a noticeable lock function
- zipped pocket on one hip fin
- different cover materials in child's seating area: airy and soft in the comfort zone and robust and washable in the foot areas
- the sturdy aluminium frame with broad platform is tip-over resistant - very helpful when getting into the seat
- two grab handles
- larger pillow and sun roof available as accessories
- folds for transport
- key holder
- Material: 210D PA

JAYPACK 34+

MARKETING STYLE

RECYCLED FABRIC

RECYCLED FABRIC FOR GREATER SUSTAINABILITY

Durable, hardwearing, water-resistant, PFC-free, 100% recycled body fabric gives this lightweight camera backpack excellent environmental credentials, which combined with high-quality craftsmanship and robust, built-to-last details, makes it a sustainable choice too.

Details Jaypack: 34+

Whether it's a moment in sporting history, beautiful landscapes, or wildlife up close and personal, with this professional camera backpack you'll never miss a shot.

flexi spring steel frame for effective load transfer

stabilizer straps

precision-adjustable sternum strap

detachable, ergonomic, padded hip fins with two zippered pockets

water-resistant, TPU-reinforced stable base

meets the usual hand luggage dimensions thanks to removable hip fins, straps and appropriate size

two large stretch side pockets for water bottles or small tripod

glasses stow system on shoulder strap

zippered valuables pocket inside lid

lockable zippered front compartment with double-padded laptop sleeve, three small, zippered pockets and a stash pocket for lens filters, flashes, light reflectors, plus loops for pens or brushes

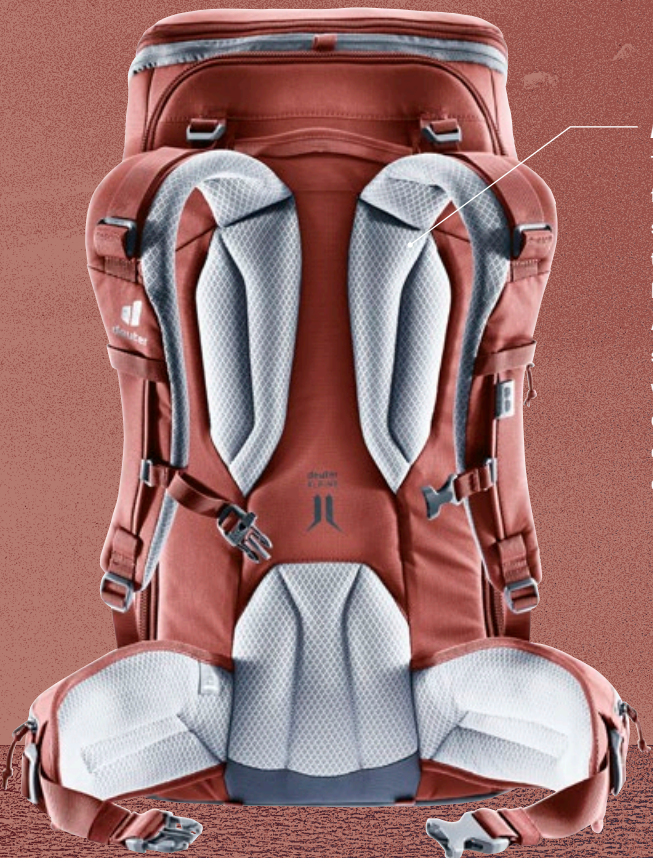

quick and easy access to main compartment via sturdy zip around rear opening

- top-loading lockable lid compartment with 4 liters capacity extension for change of clothes, jacket, snacks, first aid kit etc.
- zip-through lid compartment base for direct access to main compartment
- three zippered pockets on reverse side of back panel for smaller items like filters etc.
- large main compartment with Velcro dividers that can be moved to accommodate a range of sizes and types of camera gear: 5 x 1-bay dividers, 3 x small 1-bay dividers, 2 x 2-bay dividers, 2 x 3-bay dividers, 2 x 4-bay dividers
- to fit a pro mirrorless or pro DSLR with portrait grip and accessories

- designed to fit telephoto up to 500 mm with lens hood, 600-800 mm telephoto with simple lens hood, and when using extended capacity, a camera with mounted telephoto
- four modular gear straps and one side strap with aluminum hook buckle to attach further gear like a sit mat, jacket, or big tripod
- precise tripod positioning means backpack remains upright when placed on the ground
- 100% recycled body fabric
- bluesign® certified body fabric
- Material: 330D TEXTURED WEFT REC PA

ALPINE BACK SYSTEM

deuter
ALPINE

ERGONOMIC BACK COMFORT

The back system's ergonomically formed padding molds itself to the shape of your back and distributes the weight evenly, while keeping the load close to your center of gravity. Adjustable shoulder straps, sternum strap and stabilizer straps combined with the extended back panel length allows heavy loads to be transferred onto the padded hip fins, for back comfort that's ergonomic.

- bluesign® certified body fabric
- Material: 600D PES REC BS, 210D PA RECYCLED

AIRCOMFORT SYSTEM

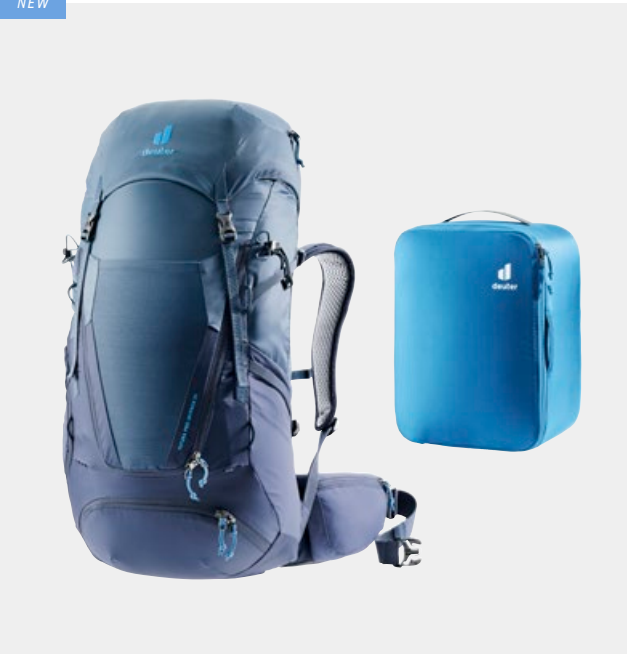

ERGONOMIC BACK COMFORT

Our proven deuter Aircomfort back system has excellent ventilation and is designed to carry heavier loads over several days. Mobile VariFlex ECL hip fins and pivoting ActiveFit shoulder straps mold to the individual and ensure the load is evenly distributed for comfort and greater energy efficiency. The special mesh on the back enhances ventilation and results in up to 25% less perspiration, and consequently greater endurance. This makes it easier to carry heavy camera gear on longer missions.

For mountaineers and trekkers looking for maximum insulation at minimal weight for extreme conditions.

Thermo Stretch Comfort seams inside: faster to warm up and comfortable to sleep in thanks to the liner that stretches up to 25 % across the width

ErgoFootPro: more sensitive foot zone is given extra space in 3D ergonomic footbox for superior insulation

ThermoHood contoured hood for a cosy head with down held securely within chambers

inside pocket

PowerBox waffle structure in the lower part of the bag keeps the down in place no matter how much movement

Dryzone: water repellent fabric with PU coating at the foot and head

draft collar

Trapezoidal chamber design prevents the formation of cold spots

top heat-to-weight ratio and packing dimensions

contrasting draw cord toggles for easy hood adjustment (even in the dark)

360° insulation

compression sack: light-weight, lateral compression, easy-to-use

storage sack included – protects the down and keeps it well aired

2-way zip

anti-snap zip baffle

bluesign® product

RDS certified down

PFC-free water and dirt repellent finish

perfect for alpinists – both inside a tent under a starlit sky

Filling: 750+ cuin / 90/ 10 Down RDS/ bluesign®
Inner shell:
20D PA RIPSTOP
Outer shell:
20D PA RIPSTOP + DWR

Details Astro Pro SL

• SL models are shorter in length and the shoulder and foot sections slightly narrower

• SL models have proportionally more down fill compared to REG models

360° fill system for 360° warmth

The top and bottom layers of a deuter sleeping bag are identical and contain the same amount. That's because we are aware that despite EN-norm tests assuming that a person will lie on their back, in reality, people move about in their sleep. By using our 360° fill system, we can guarantee our comfort ratings in all sleeping positions - and no more cold back!

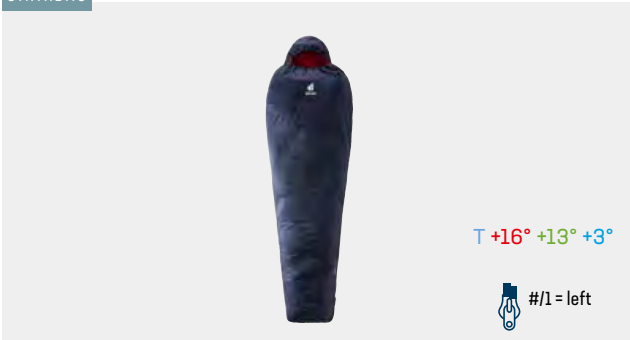

100% RDS certified down: the Astro series

- No live plucking
- No forced feeding
- Traceability in the supply chain
- Animal welfare assured at all times
- Certified and controlled by accredited institutes worldwide

Details Overnite: For young cosmopolitan adventurers who want a cozy, comfortable sleeping bag.

single-layer construction

- large head section with pillow sleeve for pillows up to 80 x 40 cm
- seam-free shell fabric for good thermal efficiency and water resistance

- evenly distributed fill for 360° insulation
- ultra-soft lining fabric
- spacious mummy shape
- 2-way zipper
- anti-snap zipper guard
- all-around zipper for quilt function
- stuff sack doubles as gym bag
- for persons up to 170 cm tall
- Filling: High-Loft Hollowfibre
- Shell: 40D REC PES RIPS
- Lining: 50D REC PES
- 100 % recycled shell and lining fabric

EASY-TRANSPORT STUFF SACK
An easy-to-use stuff sack makes this sleeping bag a delight to bring along and it doubles as a gym bag for everyday use.

RECYCLED FABRIC FOR A GREENER CONSCIENCE
A good night's sleep with a clear green conscience - because both the shell fabric and lining fabric not only feel great, but are made from 100% recycled materials, taking a strong stance on sustainability.

MULTIFUNCTIONAL PRACTICALITY
Opened out as a quilt for pajama parties with friends or zipped up as a sleeping bag on a school trip -the zip around closure and robust, high performance shell fabric make the Overnite a flexible companion for all their overnight exploits.

LUXURIOUS FILL FOR RESTFUL SLEEP
The large, soft head section with pillow sleeve and high-loft hollowfiber fill give this bag cozy sleeping comfort and well balanced insulation.

INFINITI SERIES- MADE FROM REMNANTS

And with it, we've managed to cut down our carbon footprint even further. By taking remnants from our production we've developed versatile, sustainable products in what we call the Infiniti series. These bags and packs are made from lovely fabric remnants from the manufacture of existing deuter products.

For the Infiniti series, we use remnants fabric from our production line that is 100% functional. This surplus fabric, which would otherwise go to waste, is turned into a series of bags and packs, thereby reducing the ecological footprint of our production. There are variations between the individual products in terms of the way these fabrics are applied, the surface area that is used and their aesthetics. But all fabrics are tested for functionality to ensure the end product is of a consistently high standard.

deuter is proud to support the 1 % for the Planet nonprofit organization with sales of its Infiniti series. 1 % for the Planet supports businesses and individuals in giving back to the planet in the most impactful way possible by building strategic partnerships that connect funds with causes. By donating 10% of the buying price of the Infiniti series to 1% for the Planet, deuter is delighted to be supporting environmental projects throughout the world.

For more information about 1% for the Planet visit:

- grab handle
- free space for personal additions
- quick access to entire content thanks to all-round zip opening
- fold-out storage
- emergency instructions
- grab handle
- material: 420D PA RECYCLED

Our manufacturing process well as the quality of the textiles we use ensures the long-time durability and longevity of our products. The materials we use are adapted to their future use as backpack textiles and produced especially for deuter. Performance, deuter's standards, and their safety for consumers are regularly tested in labs and are therefore assured.

The majority of the raw material we use in our textiles is polyester (PES) and polyamide (PA). They handle well due to their properties and they are robust and tearproof. The outer fabrics we use, especially our rain covers, are water resistant. This provides ideal traits of products that are intensively used outside like our backpacks and sleeping bags.

All our textiles are coated on the inside, making the respective material more durable, more water repellent, and the seams more stable. The consistency and strength of this polyurethane coating (PU) varies depending on its future use. The outside of our textiles is treated with a DWR (Durable Water Repellent) coat to obtain a high level of water and dirt repellent properties. We only use PFC free finishings.

We use textiles in differing strengths to make sure our products fulfil their respective function. We state these in denier (D). This measurement unit is established in the outdoor market and has lead to comparability within our own collection. It goes back to the old French unit of weight also called denier. This means that 1D = 1 gramme per 9000 meters of yarn. The lower the number in front of the "D" the thinner the respective textile. Our unit therefore describes fabrics that range from very sturdy and durable to extremely light textiles.

However, the durability and strength of a textile cannot only be taken from its denier number. The weave, structure, and application-oriented mix of raw materials also plays a role.

The finishing of the yarn before the weaving process also has a decisive impact. We also state relevant equipment and features. Weaving in stronger threads or reinforced structures can make thinner material more durable and more stable. We call this feature "Ripstop" for example. If other processed or surface-finished yarns are used then the product is labelled with "high tenacity".

YKK® zippers: The most high-quality zippers available on the market are absolutely robust and reliable.

Multi-chamber aluminium profile rails: The weight-bearing elements of our backpacks are made from high-quality aluminium. This makes them durable and light at the same time. Its special constructions makes it possible to combine these two traits. A flat aluminium rail is separated into several different chambers by internal partitions. The cross sections shows a hive-like structure that provides stability. The multi-chamber aluminium profile rails are used in differing widths depending on the model of the backpack.

Permanently elastic spring steel frames: Spring steel is incredibly durable and elastic. It springs back into form again and again nearly unbreakable after being deformed. A round profile allows a very flexible construction of the frame. A flat profile provides a frame with extremely high form stability. Both give our Aircomfort models with its patented ventilation a permanently stable tension of the back net.

Our upper materials and filling for sleeping bags are made of polyamide and also polyester for the most part. We predominantly process textiles with low deniers. These are also often structured. The fabrics are light and at the same time very durable and always moisture repellent. PFC free materials are increasingly being used. In addition we also make sure to use breathable materials to ensure pleasant sleeping conditions.

Fabric in the so-called Dryzones is especially processed and enables a high water column. The sleeping bag stays comfortably dry.

Our fillings are also light and comfortable. Good insulation properties and breathability are necessary requirements for the materials that we use in our products.

Some of our sleeping bags used brushed materials like the Brushed Thermo Fleece. The light and very high-quality polyester fleece feels soft and cozy to the skin due to its fluffy brushed surface. The material offers an excellent warmth-weight ratio. Furthermore it is highly breathable, long-lasting, and easy to clean. Its short drying time is another benefit.

Its high level of elasticity supports freedom of movement of the Thermo-Stretch-Comfort-construction in our Exosphere SL models. It also keeps warm in the Orbit SL models.

FILLING SLEEPING BAG

Synthetic

High-Loft Hollowfiber: Synthetic hollow fibres are processed to a filling fleece (by thermal bonding). To ensure good compression and high loft, silicone is added. Remarkable insulation rating, tear resistant and durable.

Thermo ProLoft®: A special thermal process turns Polyester fibres into top quality technical Thermo ProLoft® insulating fleece. The combination of dense and hollow fibres results in the perfect blend between durability, weight and warmth properties - a fleece material that is easy care and durable yet compact and offers excellent insulation at minimal weight. The synthetic fibres also absorb very little moisture. Short drying times, excellent loft and thus insulation properties even when damp, are all advantageous characteristics. deuter Thermo ProLoft® is also coated with a thin layer of silicone to give it good lofting properties.

Combining: deuter sleeping bags Orbit, Exosphere and Space can be zipped together. Use left-hand zip and right-hand zip versions when combining.

Down

Since June 2005 we only use down feathers certified in accordance with the Responsible Down Standard (RDS) - benefits: no live plucking, no force feeding, supply chain traceability, animal welfare guaranteed at every stage and verification by independent certification institutes around the world.

Composition: The deciding factor in a down sleeping bag is the down quality. Primarily this is a matter of the weight ratio of down to small feather mixture, which is expressed in percent. deuter uses only the high performance filling ratio of 90% down to 10% small feather (90/10).

Fill power / cuin: High quality sleeping bags should have a fill power of at least 650 cuin (cubic inches). This measurement in cubic inches per ounce of down shows the quality of the bulking and expansion power of the filling. High quality down has a bulking volume of 650 cuin (10.6 litres) per 1 ounce (28.3g). A bulking power of 550 cuin, and higher is good; of 650 - excellent; and 800 is almost impossible. In the end: the higher the volume the better the insulation value.
