**WORKBOOK** Summer 2021

[ortovox.com](https://www.ortovox.com)

**IT'S HARD TO FIND THE RIGHT WORDS WHEN YOU FIND YOURSELF AT THE MERCY OF A SITUATION.**

When you're drowning in feelings of powerlessness and anxiety. As athletes, we're used to being on the move and experiencing the freedom of the mountains. Now, that has been taken away from many of us. But we aren't reduced to just our bodies. Powerlessness gives way to realization. We are fighting our helplessness with flexibility and trust. And the physical distance between us is exactly what's bringing us closer together.

This crisis, which has deeply affected and shaken us all, has made us aware of many issues. Primarily, it makes us aware just how powerful nature truly is. Perhaps this realization had to come to us with such force in order to initiate a change in thinking at a higher level. We are a part of nature; it determines our lives. We are responsible for treating it with humility and respect, instead of exploiting it. Protection and sustainability are two cornerstones of our brand. With ProtACT24, we are pursuing ambitious goals – goals that are worth every effort.

In Tasmania, home to our merino farmers, a natural disaster has been taking place for years: In the northwest of their island, one of the most important rainforests in the world – takayna / Tarkine – has become the victim of large-scale deforestation for the mining and logging industries. As a Bavarian brand, we paired up with the Bob Brown Foundation to protect this valuable landscape on the other side of the world – for the simple reason that all things are connected. And that is the second realization we have come to as a result of the Corona crisis.

We are all part of a whole. This can cause threats to the globe. But it's also our greatest strength. In this uncertain, populist world,

**CHRISTIAN  
SCHNEIDERMEIER**  
CEO ORTOVOX

**"IN THIS UNCERTAIN, POPULIST  
WORLD, WE NEED STABLE  
VALUES TO ANCHOR US."**

we need stable values to anchor us. And we need to be sure that we are part of a strong team. And we are. Whether as friends on a high alpine tour or as colleagues and partners in our everyday lives. We'll be

able to prove this now by weathering the current storm together.

The strength of our team is also evidenced by our summer 2021 collection. Looking at it after all of our months of work, we aren't just proud – we can also see how it all comes together and makes sense as a whole. It is a collection that follows the example of nature in many aspects, while also adapting to nature and providing maximum protection – both for us humans and for nature.

We don't know how things will turn out. There's a great deal of uncertainty and challenges ahead. But we'll get through them together. Because we are a strong brand with strong values. Because the direction we've chosen will take us to the right kind of future. And because we have you.

On that note: Thank you for being part of ORTOVOX.

## PROOFED BY THE MOUNTAINS

Weather shapes and challenges us, gifts us the moments in which we experience ourselves most intensely. No matter the weather we're faced with, our weatherproof **DRY SERIES** ensures we're 100% ready to go in all conditions, even without a rain cover – and 100% PFC free.

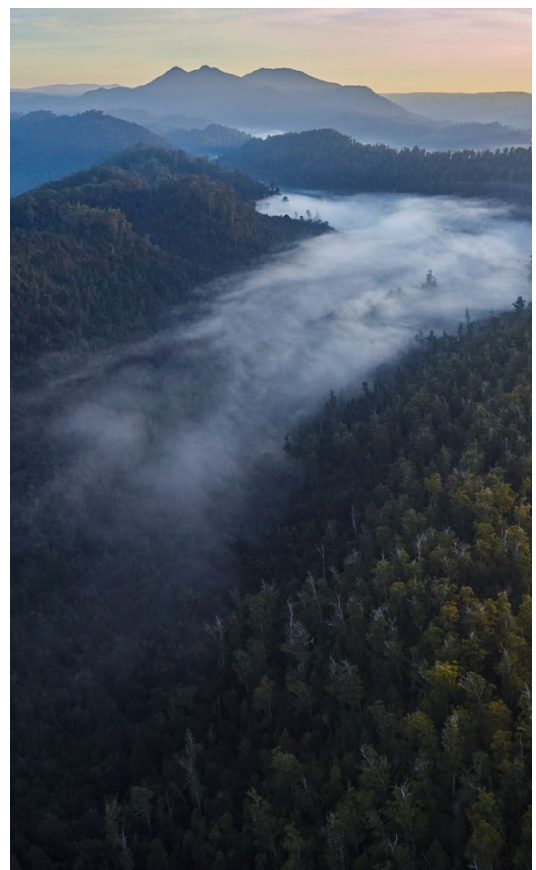

## VERSATILE. LIKE THE MOUNTAIN.

We are challenged by constantly changing conditions – and the same applies to our clothing. No matter the weather, no matter the terrain: Our **WESTALPEN** line is the answer to all the demands the mountain can throw at us.

## PRESERVE THE LAST WILDERNESS

The destruction of one of the oldest, most uniquely diverse rainforests in the world in the home of our merino farmers moves us – and affects us all. With two exclusive **TARKINE STYLES**, we want to do our little part in saving one of the last wild places on earth.

# PROOFED BY THE MOUNTAINS

*Some might say I couldn't care less about you, but I guess that would be a myth. I am me because of you. Since you do point out all my personal boundaries. A hundred times I gave up or never started in the first place, thanks to you.*

*Some might say I hate you, but that surely would be a misunderstanding. Your unpredictability brought me to my knees. Limit my possibilities. A place to learn who I really am.*

*Some might say I am your friend. Maybe that's true. Because I accept you for who you are. No matter if your outbursts hit me or your lovely warmth caresses my soul.*

*Some might say I'm devoted to you. But you know what? That's the good thing about friendship.*

*I never forget that it's you, who gives me those magical and unforgettable moments...*

## TRUE BACKPACKS. NO WEATHER WHAT.

Weather shapes and challenges us, gifts us the moments in which we experience ourselves most intensely. No matter the weather we're faced with, our weatherproof **DRY SERIES** ensures we're 100% ready to go in all conditions, even without a rain cover – and 100% PFC free.

WEATHER  
YOU'RE MY  
FRIEND,  
NO MATTER  
HOW YOU ARE.  
LET'S WALK.  
SIDE BY SIDE.

Our first weatherproof backpack range, optimized for mountaineering, climbing and high alpine tours.

# HIGH ALPINE SERIES PEAK 40 DRY

**WEATHERPROOF IN ALL CONDITIONS:** The PEAK DRY is an uncompromising backpack for demanding alpinists who want to be out in the mountains in all conditions, on high alpine summits or on exciting multi-day tours! While a day on the summit should always be sunny, it's not uncommon to experience variable conditions. The weatherproof PEAK DRY will keep everything in your backpack dry thanks to the **HIGH-FREQUENCY WELDING** that makes **ALL THE SEAMS WATERPROOF**. Most importantly, all the features will **FUNCTION IN ANY WEATHER** because the fastening options are left uncovered. Our DRY backpacks are particularly **ENVIRONMENTALLY FRIENDLY** because they require no DWR coating and are thus **PFC-FREE**. The Full Contact Light back system with stabilizer provides a comfortable fit and great control even with a heavier load, while the hip belt optimally distributes the weight. For those who wish to reduce weight: the hip belt, ice axe holder and lid compartment can be removed. The PEAK DRY thus provides greater independence in the mountains and is a reliable companion wherever you go.

# CLIMBING SERIES TRAD 30 DRY

No matter how good the weather might seem, it's better to be prepared for anything when on long alpine climbing tours. The **WEATHERPROOF** TRAD DRY will keep everything in your backpack dry thanks to the **HIGH-FREQUENCY WELDING** that makes **ALL THE SEAMS WATERPROOF**. Because there is no rain cover, equipment can easily be reached via the **ROLLTOP OPENING** and via attachment options for helmet, ice axe and rope. Our DRY backpacks are particularly environmentally friendly because they require no DWR coating and are thus **PFC-FREE**. The CLIMBING SERIES is also characterized by its extremely robust, **SCUFF AND TEAR-RESISTANT MATERIAL** that is more than a match for any dihedral or chimney. Its comfortable Full Contact Light back system provides an optimum balance of weight, stability and load control. The TRAD DRY is thus a reliable, adept climbing partner that has been streamlined to focus upon the essentials: So there's nothing standing in the way of a rock-face adventure.

# ALPINE SERIES TRAVERSE 30 DRY

On long, extensive alpine tours, the weather is an unknown entity. The weatherproof TRAVERSE DRY will keep everything in your backpack dry thanks to the **HIGH-FREQUENCY WELDING** that makes **ALL THE SEAMS WATERPROOF**. Most importantly, all the features will function in any weather because the fastening options are always accessible. Our DRY backpacks are particularly environmentally friendly because they require no DWR coating and are thus **PFC-FREE**. The tried-and-tested Comfort Contact back system is characterized by its uncompromising comfort, load control and ventilation, while the **ERGONOMICALLY SHAPED SHOULDER STRAPS** and **BROAD HIP BELT** distribute weight evenly. Anyone looking to save on weight can completely remove the lid compartment to increase their flexibility in the mountains. So from now on you can concentrate on your mountain adventure because the TRAVERSE DRY will take care of the rest.

4. MORE DETAILS: equipment loops on the shoulder straps
5. INCREASED POSSIBILITIES: pole attachments

# ALPINE SERIES TRAVERSE 30

Those aiming for high summits often have to walk for a long time and carry big loads. Therefore, a backpack with a well-ventilated back system and good load distribution is essential. This is exactly where the extremely versatile TRAVERSE from the ALPINE line comes into play. Thanks to the ribbed, webbed material and **PERFORATED FOAM** in the back pads, the improved Comfort Contact Back System provides improved **AIR CIRCULATION** and more **COMFORT**. The **ERGONOMICALLY SHAPED SHOULDER STRAPS** and **BROAD HIP BELT** distribute weight evenly across the body. The TRAVERSE 30 also performs well in the mountains thanks to small changes such as an integrated helmet net and stowable equipment loops on the shoulder straps. In the interest of sustainability, the PFC-free outer material is now made from 72 % recycled Robic polyamide: This makes TRAVERSE backpacks extremely robust while minimizing their ecological footprint.

# TOUR SERIES TRACE 25

For ambitious ski tourers who want things **LIGHT, FAST** and **SAFE**: our **TRACE SERIES** is the perfect companion for prolonged ascents and quick descents! With a minimalistic and well thought-out design, this **LIGHT SKI TOURING BACKPACK** focuses on the fundamental features: The removable **2FOAM BACK PANEL** ensures increased stability, comfort and **PROTECTION**. We have also equipped TRACE with reflective elements so that it's **VISIBLE**, even in the dark. Safety equipment can be stored in the main compartment, leaving room for clothes and other material. When the ascent gets tougher, the mesh side pocket with two openings provides quick access to your drink. Additional features such as a diagonal ski fastening, ice axe and hiking pole fastening, and integrated helmet net make the lightweight TRACE a dedicated ski touring partner that will never let you down.

# BACK SYSTEMS

## FULL-CONTACT-LIGHT-BACK SYSTEM

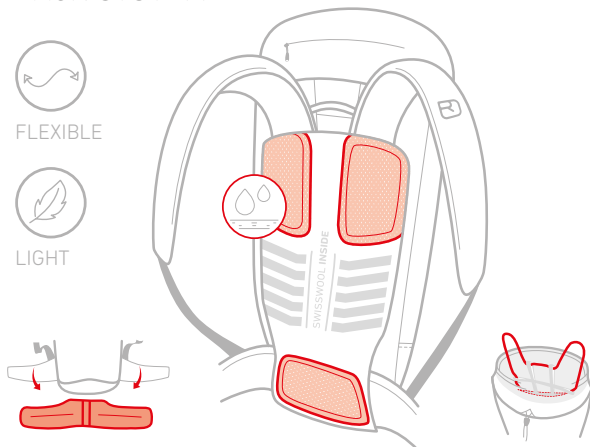

The 3D foam back system is simultaneously **LIGHT** and **STABLE**. This back system **DISTRIBUTES LOADS EVENLY** between the hip fins and the slightly padded shoulder straps. The back system is used in the PEAK DRY, TRAD DRY, ALLMOUNTAIN and ASCENT. In addition, all PEAK DRY and ASCENT (28, 30, 32, 38, 40) are optimally adapted to the course of the spine thanks to an **ERGONOMIC S-SHAPE**.

## COMFORT-CONTACT BACK SYSTEM

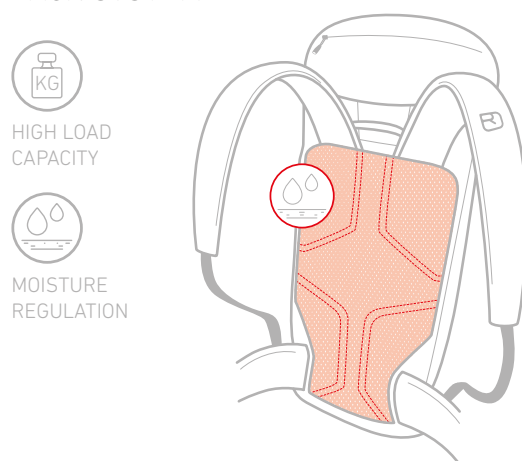

The **CONTACT PADS** in our ALPINE SERIES lightweight back system ensure **CIRCULATION OF AIR** and make our backpacks a pleasure to wear during activities that involve a great deal of movement. In addition, the soft pads offer extremely high wear comfort.

## SWISSWOOL-TEC-KNIT BACK SYSTEM

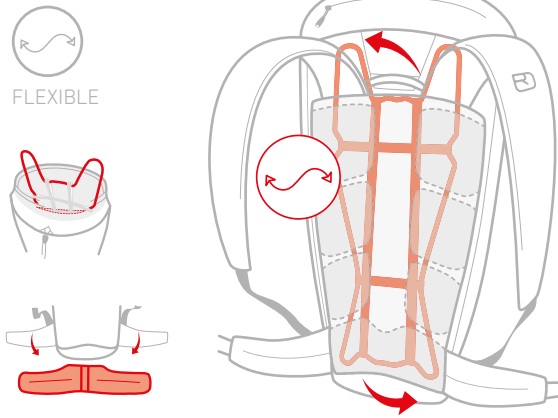

In the SWISSWOOL-TEC-KNIT BACK SYSTEM of our PEAK LIGHT backpacks, we combine foam and pressed swiss wool covered with a **HIGH-TECH KNITTED FABRIC** with varying breathability. In areas with lots of back contact, we have used **SWISSWOOL® PADS** with more breathability. That means that the wool can absorb moisture (sweat) much faster and is simultaneously **MORE BREATHABLE** and **FEELS DRY** on your back – even during sweat-inducing climbs. We have placed foam in areas with less back contact to offer more **STABILITY** and better **WEAR COMFORT**.

## SWISSWOOL-FULL-CONTACT BACK SYSTEM

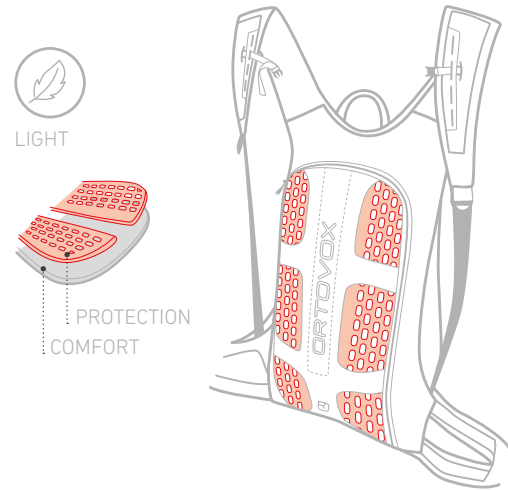

The Swisswool backs on our PEAK SERIES backpacks are made of pressed **WOOL FLEECE** with a punchhole covering. Thanks to the wool, the backpack can **ABSORB MUCH MORE MOISTURE FROM THE BACK** and at the same time is **MORE BREATHABLE** than conventional backpacks that are made using foam material, for example. The FULL CONTACT BACK fits closely to the body and offers optimum weight distribution. The back design consists of three aluminum stays that offer **HIGH STABILITY** and guarantee **GREAT COMFORT**, even when the backpack is heavily loaded.

## HIGH-FLEX-CONTACT BACK SYSTEM

The back system for our CLIMBING SERIES offers a lightweight, **REMOVABLE ALUMINUM FRAME** and a **FULL-CONTACT CARRYING SYSTEM**. The frame is very flexible, but rigid along the horizontal axis in order to bear as much weight as possible. Thanks to its 3D shape, the backpack fits closely to the back and guarantees **GREAT FREEDOM OF MOVEMENT** and the best possible wear comfort.

## 2-FOAM-BACK SYSTEM

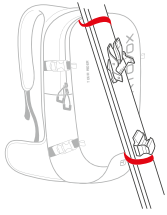

The **ULTRA-LIGHT 2FOAM** back panel is the basis for **STABILITY, COMFORT** and **PROTECTION** in the TRACE series. While the soft outside guarantees comfort, a harder internal foam protects against injuries such as those caused by emergency equipment.

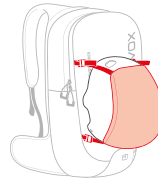

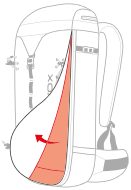

# BACKPACK FEATURES

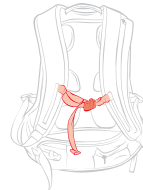

**D-SKIFIX**  
Diagonal ski fastener,  
versatile in use.

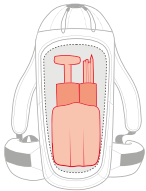

**HELMET NET**  
Removable net for convenient  
and secure fastening of a helmet,  
which can also be used in  
combination with attached skis.

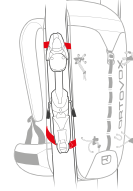

**CIRCUMFERENTIAL ZIPPER**  
Rapid access to the entire  
contents of the main  
compartment through the  
convenient front access.

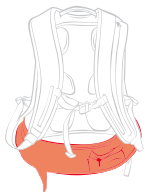

**CHEST STRAP WITH  
ALARM WHISTLE** to  
quickly draw attention in  
emergency situations.

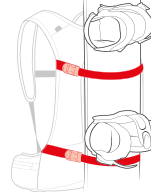

**SAFETY COMPARTMENT**  
Immediate access to  
emergency equipment.

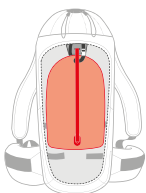

**COMPRESSION STRAP**  
Simple backpack compression  
with little content. Also serves  
as a side ski fastener.

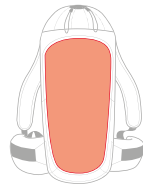

**WIDE HIP BELT**  
Wide and elasticated for an  
optimal body-hugging fit,  
even when in motion.

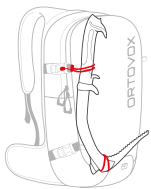

**SNOWBOARD AND  
SNOWSHOE FASTENER**  
Flexible carrying  
fastener for snowboards,  
snowshoes, and others.

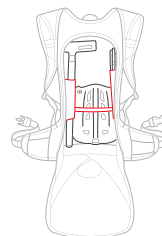

**HYDRATION SYSTEM  
COMPATIBLE**  
Secure holder for all common  
drink bladders. (all models)

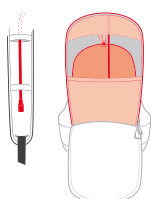

**BRIGHT INSIDE**  
Light colors inside make  
it easier to find your  
equipment.

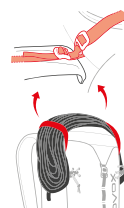

**ICE AXE AND HIKING POLE  
ATTACHMENT**  
Simple, rigid fastener allows rapid  
access to ice axe and poles.

**BACK ACCESS**  
Rapid and convenient  
access to the entire  
contents of the main  
compartment.

**INSULATED  
SHOULDER STRAP**  
Prevents freezing of  
drinking tube.

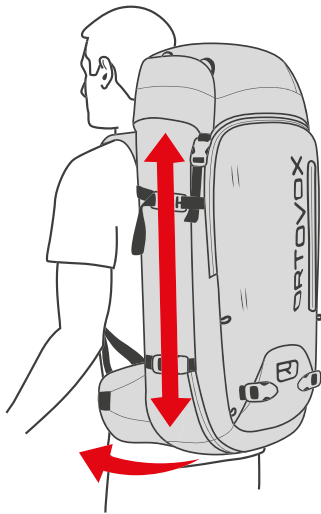

**ROPE ATTACHMENT**  
Simple attachment allowing for  
rapid access without having to  
open the cover.

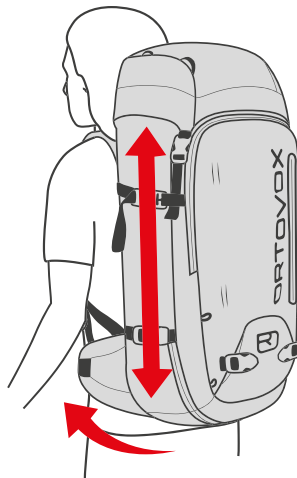

# S-BACKPACKS

ERGONOMIC OPTIMIZED BACKPACKS FOR WOMEN AND MEN WITH SHORTER BACKS

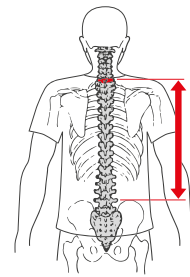

REGULAR  
BACK SYSTEM  
42 - 50 CM\*

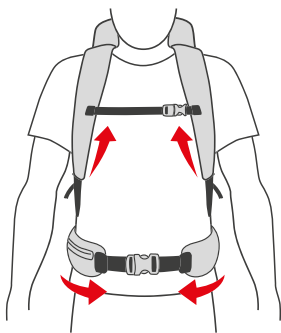

SHORT  
BACK SYSTEM  
36 - 44 CM\*

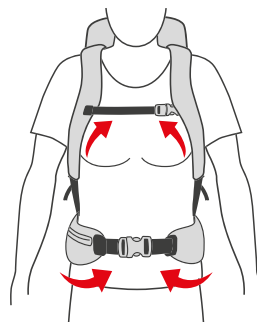

To determine the **BACK LENGTH**, use a measuring tape to measure yourself from the **TOP OF THE HIP BONE UP TO the 7TH CERVICAL VERTEBRA** (it clearly protrudes).

SHOULDER STRAPS ARE WIDER AND LONGER, AND ADJUSTED TO FIT A MORE VOLUMINOUS UPPER BODY

SHOULDER STRAPS ARE THINNER AND SHORTER AND HAVE A PRO-  
NOUNCED S-SHAPE

Our S-backpacks are **SPECIALLY DESIGNED FOR WOMEN AND MEN WITH SHORTER BACKS**.

They are primarily characterized by their significantly shorter back system, which makes them **PERFECT FOR PEOPLE WITH SHORT BACKS**. The hip and shoulder straps have also been adapted to the **FEMALE ANATOMY**: The shoulder straps are thinner and shorter and have a pronounced S-shape. However, the hip fins are shorter and conical formed.

HIP FINS ARE ERGONOMICALLY SHAPED

HIP FINS ARE SHORTER AND CONICAL FORMED

\*The sizes are advisory only. All backpacks should be tried on in person.

# SAFETY ACADEMY GUIDE BOOK FIRST AID

**DANI HORNSTEINER**

is a specialist for first aid in alpine terrain, DAV-Guide and head of operations at Bergwacht Bayern.

## BE PREPARED FOR AN EMERGENCY – BECAUSE GOAL-DIRECTED ACTIONS CAN SAVE LIVES

Take a tour of our material – our ropes, harnesses, carabiners, avalanche transceivers and air-bag backpacks. At the start of the winter season, we might go on an avalanche transceiver course or train with the device at home to remind ourselves of the procedure.

But how much do we know about emergency management in the mountains and how much practice do we have? How prepared are we for an accident or illness when on a tour? It can take a long time for mountain rescue services to reach an injured party in the mountains. Therefore, being well prepared is just as important as having a

functional avalanche transceiver. Knowing how to help can save a life and ensure the injured person is as well as they can be until professional help arrives.

Our First Aid Guide Book helps make the mountains safer. Even though it doesn't replace an alpine first aid course, it provides important basic knowledge about emergency management in alpine terrain. Quick, calm action and the assurance of knowing that you are doing the right thing form the foundation for a good care. Our practical courses offer important exercises for this.

Download the story package from the mediroom on [ortovox.com](https://www.ortovox.com), available end of october 2020

## ENHANCING EXPERTISE – GUIDE BOOKS FOR SPECIALIST DEALERS

Our Safety Academy is proof of how seriously and resolutely we pursue our role as mountain safety experts. Our responsibility not only to develop the best, safest equipment for alpine activities, but also to impart sound expert knowledge.

Our materials also help specialist dealers to sustainably position themselves as experts. Use our free materials, such as the SAGB, to enhance your expertise, create awareness and make mountain sports safer.

1 PU: 200 pcs.  
incl. presenter

## THE SAGB FAMILY AT A GLANCE

Our Safety Academy series currently comprises three guide books. Together with the Verband Deutscher Berg- und Skiführer (German mountain and ski guide association) we have developed the SAGB Rock and Snow. These provide basic knowledge for climbers and mountaineers, as well as basic avalanche knowledge for tourers and freeriders. The new First Aid Guide Book rounds off the series.

# FIRST AID WATERPROOF MINI

Characterized by its alpine origin, ORTOVOX develops emergency products that can **SAVE LIVES IN AN EMERGENCY**. Our first aid sets are getting some **WATERPROOF** additions in the form of the new FIRST AID WATERPROOF and FIRST AID WATERPROOF MINI. The FIRST AID WATERPROOF MINI is a **COMPACT, LIGHT** companion that should be part of any mountain climber's basic equipment. The contents are neatly divided between two compartments. Illustrations and captions provide information on the contents and **IMPORTANT FIRST AID TIPS**.

## FIRST AID WATERPROOF MINI

# 23401

**SIZE** 13 x 9 x 4,5 cm  
**WEIGHT** 150 g  
**COLOR** ● shocking orange

### FEATURES

Waterproof  
 Compact pack size  
 Clear partitioning of contents  
 Quick access to contents using the rolltop  
 Space for additional individual use

### CONTENTS

**COMPARTMENT 1:** 1x Rescue blanket 160 x 210 cm

#### COMPARTMENT 2:

1x Emergency card  
 1x Nonwoven swab 10 x10 cm sterile  
 1x Roll of adhesive tape  
 1x Standard dressing  
 1x Scissors  
 Set of adhesive bandages:  
 • 4x adhesive bandages 2,5 x 7,2 cm  
 • 2x adhesive bandages 1,9 x 7,2 cm  
 • 3x finger dressings 4,4 x 7,6 cm  
 1x Disposable vinyl gloves

## FIRST AID WATERPROOF

# 23400

**SIZE** 15 x 10 x 6 cm  
**WEIGHT** 240 g  
**COLOR** ● shocking orange

### FEATURES

Waterproof  
 Compact pack size  
 Clear partitioning of contents  
 Quick access to contents using the rolltop  
 Space for additional individual use

### CONTENTS

**COMPARTMENT 1:** 1x Rescue blanket 160 x 210 cm

#### COMPARTMENT 2:

1x Emergency card  
 1x Nonwoven swab 10 x10 cm sterile  
 1x Elastic conforming bandage  
 1x Standard dressing

#### COMPARTMENT 3:

1x Roll of adhesive tape  
 1x Scissors  
 1x 8cm tweezers  
 1x CPR face shield  
 Set of adhesive bandages:  
 • 4x adhesive bandages 2,5 x 7,2 cm  
 • 2x adhesive bandages 1,9 x 7,2 cm  
 • 3x finger dressings 4,4 x 7,6 cm  
 1x Disposable vinyl gloves  
 1x Adhesive blister bandages  
 5x Butterfly closures

**COMPARTMENT 4:** 1x Triangular bandage

# FIRST AID ROLL DOC MID

Compact first aid that can save lives in an emergency: Whether it's a rescue blanket, wound compresses, disposable gloves, scissors, or other important first aid utensils – the FIRST AID ROLL DOC MID is perfectly equipped for **EMERGENCIES**. **ALL IMPORTANT KIT CONTENTS** are neatly divided between four compartments and therefore **EASY TO ACCESS**. Illustrations and captions also provide information on the contents and **IMPORTANT FIRST AID TIPS** that help you keep a cool head in an emergency.

## EMERGENCY CARD

More efficient treatment of injured persons thanks to more information.

**FOR FIRST RESPONDERS:** Basic information for notifying emergency contacts and making emergency calls.

- ACCIDENT VICTIM'S CONTACT DETAILS
- EMERGENCY CONTACTS
- ALPINE DISTRESS SIGNAL
- EMERGENCY NUMBERS

**FOR EMERGENCY RESCUE:** Information for better treatment of accident victims.

- INFORMATION ABOUT THE ACCIDENT
- ALLERGIES
- ILLNESSES
- CONTACT DETAILS

There is an emergency card in **ROLL DOC**, **ROCK DOC**, **WATERPROOF**, and inside all ORTOVOX **BACKPACKS**.

## FIRST AID ROLL DOC MINI

# 23303

**SIZE** 15 x 8 x 3 cm (compact)  
15 x 29 cm (rolled out)  
**WEIGHT** 160 g  
**COLOR** ● shocking orange

### FEATURES

Water resistant  
Compact pack size  
Clear partitioning of contents  
Quick access of contents via zipper  
First aid tips for treating emergencies  
Space for additional individual use  
Loop for fastening to belt  
Integrated emergency card

### CONTENTS

**COMPARTMENT 1:** 1x Emergency card

**COMPARTMENT 2:** 1x Rescue blanket 160 x 210 cm

1x Standard dressing

1x Nonwoven swab 10 x 10 cm sterile

### COMPARTMENT 3:

1x pair disposable vinyl gloves

Set of adhesive bandages:

- 4x adhesive bandages 2,5 x 7,2 cm
- 2x adhesive bandages 1,9 x 7,2 cm
- 3x finger dressings 4,4 x 7,6 cm

1x Scissors

1x Roll of adhesive tape

## FIRST AID ROLL DOC MID

# 23302

**SIZE** 15 x 7,5 x 6,5 cm (compact)  
15 x 42 cm (rolled out)  
**WEIGHT** 200 g  
**COLOR** ● shocking orange

### FEATURES

Water resistant

# FIRST AID BIVY PRO

Protection and rescue equipment in one! Whether the bivouac is planned or you have to spend an unintentional night on the mountain because of a sudden change in the weather or an accident – our BIVI PRO will protect you! It is **WINDPROOF** and, thanks to the PU coating, also **WATER AND DIRT RESISTANT**; a **SILVER LINING** on the inside protects against cold by **REFLECTING BODY HEAT**. But the lightweight and extremely robust BIVI PRO is far more than just a bivi bag. Thanks to its many loops, it **CAN BE USED IN A NUMBER OF WAYS**. It is perfect for professional, improvised descent transport of an injured party and for preparing a bivi bag knot, but can also be converted into a seated tent or sun awning. Despite its compact size, the BIVI PRO offers space for 1–2 persons and comes in a stowaway bag, which thanks to its rolltop, can easily be compressed.

**BIVY ULTRALIGHT**

# 25100

**SIZE** 110 x 235 cm  
**PACK SIZE** 5 x 9 cm  
**WEIGHT** 150 g  
**COLOR** ● shocking orange

**FEATURES**

Compact size: suitable for 1 and 2 persons  
 Super-light 150 grams  
 Minimal pack size: 50 x 50 x 90mm  
 Protection from cold: high radiation reflection thanks to a silver coating on the inside  
 Waterproof  
 Windproof  
 Includes stowaway bag

**BIVY SINGLE**

# 25030

**SIZE** 70 x 230 cm  
**PACK SIZE** 6,5 x 22 cm  
**WEIGHT** 280 g  
**COLOR** ● shocking orange

**FEATURES**

For 1 person  
 Water and dirt repellent thanks to PU coating  
 Robust material in a signal color  
 Alpine distress signals printed on the cover  
 Compressible stowaway bag with rolltop  
 Windproof

**BIVY DOUBLE**

# 25040

**SIZE** 110 x 230 cm  
**PACK SIZE** 8 x 22 cm  
**WEIGHT** 420 g  
**COLOR** ● shocking orange

**FEATURES**

For 2 people  
 Water and dirt repellent thanks to PU coating  
 Windproof  
 Robust material in a signal color  
 Alpine distress signals printed on the cover  
 Compressible stowaway bag with rolltop

**BIVY PRO**

# 25101

**SIZE** 120 x 235 cm  
**PACK SIZE** 9 x 22 cm  
**WEIGHT** 680 g  
**COLOR** ● shocking orange

**FEATURES**

Compact size: suitable for 1 and 2 people  
 Water and dirt repellent thanks to PU coating  
 Silver coating on the inside  
 Very robust material in a signal color  
 Lightweight and compact  
 Windproof  
 Alpine distress signals printed on the cover  
 Compressible stowaway bag with rolltop  
 Multifunctional use thanks to numerous loops:
 

- Seated tent with ideal protection thanks to hook and loop opening
- Improvised descent transport in an emergency
- Preparation for bivi bag knot with loops
- Tent function thanks to diverse set up options
- Sun awning

# THE WESTALPEN SYSTEM

VERSATILE. LIKE THE MOUNTAIN.

A collection with a system behind it – the most versatile that we've ever developed: Our WESTALPEN line is the answer to all the demands the mountain can throw at us. We are challenged by constantly changing conditions – and the same applies to our clothing. No matter the weather, no matter the terrain: Our WESTALPEN system can be adapted to all conditions.

THE MOUNTAIN  
DEMANDS  
CONSTANT  
ADAPTATION  
FROM US.  
IN OUR SKILLS,  
AND OUR  
CLOTHES.

NEW

# WESTALPEN 3L JACKET

**FOR HIGH ALPINE ACTIVITIES** in adverse conditions, we go all in: Our WESTALPEN 3L JACKET is technically well equipped with a robust outer layer for all adventures on rock, ice and snow. Thanks to a DERMIZAX® NX membrane, this **WIND AND WATERPROOF** jacket is particularly **BREATHABLE** and provides optimum **FREEDOM OF MOVEMENT** for demanding, combined terrain. The **2-WAY UNDERARM ZIPPERS** offer additional, variable ventilation. The special **HIGH REACH FIT** with longer sleeves and torso makes it easy to stretch your arms up, while adjustable cuffs and waistband keep out the wind, snow, and rain. The helmet-compatible hood with high-cut collar also provides extra protection. As such, the WESTALPEN 3L JACKET provides all the technical details you could ever expect from a jacket: Now there's nothing standing in the way of a high alpine adventure – whatever the weather.

- **WIND AND WATERPROOF**

Min. 20,000 mm water column – 100% windproof

- **HIGH BREATHABILITY**

Up to 15,000 g / m<sup>2</sup> / 24 h

- **DWR FINISH** Water and dirt run off

• **NON-POROUS PU MEMBRANE** Long lasting and easy to care for

- **2-WAY STRETCH MATERIAL**

# WESTALPEN 3L LIGHT JACKET

**LIGHTWEIGHT PERFORMANCE** – from the valley to the summit: Our 3L WESTALPEN JACKETS and PANTS have been developed for demanding mountaineers who are looking for the perfect symbiosis of **LIGHTNESS, PROTECTION** and **FUNCTIONALITY**. The 3L Dermizax® NX construction protects against extreme weather while the technical design focuses completely upon the **NEEDS OF ALPINISTS** in the high mountains. The WESTALPEN 3L LIGHT JACKET's high-performance fit will sit ideally no matter what movement you make in the ice, snow or mixed terrain. With additional features such as extra-large front pockets, high collar and helmet-compatible, adjustable hood, this lightweight 3L hardshell will provide alpinists with everything they need. For the WESTALPEN 3L LIGHT PANTS we have also used reinforced material in the hem area to ensure even greater protection against scuffs from crampons or rough mountain surfaces. In addition, an **INTERNAL 2-STOPPER HEM ADJUSTMENT** ensures a neat look and **OPTIMUM FIT** over climbing boots.

# WESTALPEN SOFTSHELL JACKET

Mighty glacial crevasses, combined rock and ice terrain and impressive summits: On **ALPINE TOURS**, we need clothing that is adaptable and that we can 100% rely upon. This is exactly where our WESTALPEN SOFTSHELL line comes into play: A combination of scuff-resistant MERINO NATURETEC RIPS inserts, NATURETEC LIGHT material and fine merino wool on the inside makes this line **ROBUST, BREATHABLE** and **COMFORTABLE**. With features such as an adjustable hood and mesh lined inner pockets that provide additional ventilation, the WESTALPEN SOFTSHELL JACKET is designed for those who value protection and adaptability from the valleys to the summits – in **ALL SITUATIONS** and **WEATHER CONDITIONS**.

- **MERINO NATURETEC RIPS MATERIAL**  
Particularly robust
- **MERINO NATURETEC LIGHT MATERIAL**  
Elastic and breathable

# WESTALPEN SWISSWOOL HYBRID JACKET

Swiss virgin wool meets Tasmanian lightness: The WESTALPEN HYBRID JACKET features a **UNIQUE COMBINATION** of Swiss insulation material (SWISSWOOL) and MERINO FLEECE GRID material with Tasmanian merino wool on the inside. The 70 g/m<sup>2</sup> SWISSWOOL lining is used anywhere where **ADDITIONAL PROTECTION** and warmth is required. **SUSTAINABLE SWISS VIRGIN WOOL** has been packed in an **ELASTIC, BREATHABLE** and **WIND-RESISTANT** TEC-STRETCH material. MERINO FLEECE GRID has been integrated into this hybrid jacket to complement the lightweight lining and elastic outer material: fleece material provides a great deal of **FREEDOM OF MOVEMENT**, is comfortable on the skin and boasts good **HEAT RETENTION** properties thanks to its channel structure. Tasmanian merino wool on the inside also regulates moisture and temperature levels, is soft on the skin and is naturally odor-neutralizing.

## • SWISSWOOL

- Sustainably produced
- Moisture regulating (warm even when wet)
- Ideal weight-to-insulation ratio (70 g/m<sup>2</sup>)
- Perfect pack size

## • TEC-STRETCH OUTER MATERIAL

- Breathable

- Wind and water-resistant

- elastic

## • FLEECE GRID MATERIAL

- Merino on skin
- High breathability
- Highly stretchable
- Quick drying
- Moisture regulating

# SWISSWOOL DUFOUR JACKET

Our technical collection with Swiss wool for the alpine touring season! SWISSWOOL LIGHT PURE stands for **EXTREMELY LIGHTWEIGHT INSULATING PRODUCTS** that will impress with their excellent weight-to-warmth ratio. Thanks to a lightweight wool lining (60g/m<sup>2</sup>), they can be easily compressed and thus require minimal space in your backpack. They also ensure protection against damp and wind: the **HIGHLY BREATHABLE (10,000G/m<sup>2</sup> / 24 H) MICRO RIPSTOP POLYAMIDE FABRIC** from Toray, which covers the wool, keeps wet and wind out and is highly robust.

- **PRODUCED AND PROCESSED IN AN ENVIRONMENTALLY-FRIENDLY WAY**
- **SUSTAINABLE RAW MATERIAL**
- **OPTIMIZED PACK SIZE**
- **IDEAL WEIGHT-TO-INSULATION RATIO** (60g/m<sup>2</sup>)
- **WIND AND WATER-RESISTANT**
- **MICRO RIPSTOP:** breathable (10,000g/m<sup>2</sup> / 24h) and robust (>20,000 abrasion cycles in the Martindale test)
- **WARM EVEN WHEN WET** (better than down)
- **MOISTURE REGULATING:** can absorb and release large quantities of moisture (better than synthetic fibers)

# SAFETY ACADEMY LAB ICE

EVER SINCE 1980 THERE HAS BEEN NOTHING MORE IMPORTANT TO US THAN YOUR SAFETY IN THE MOUNTAINS.

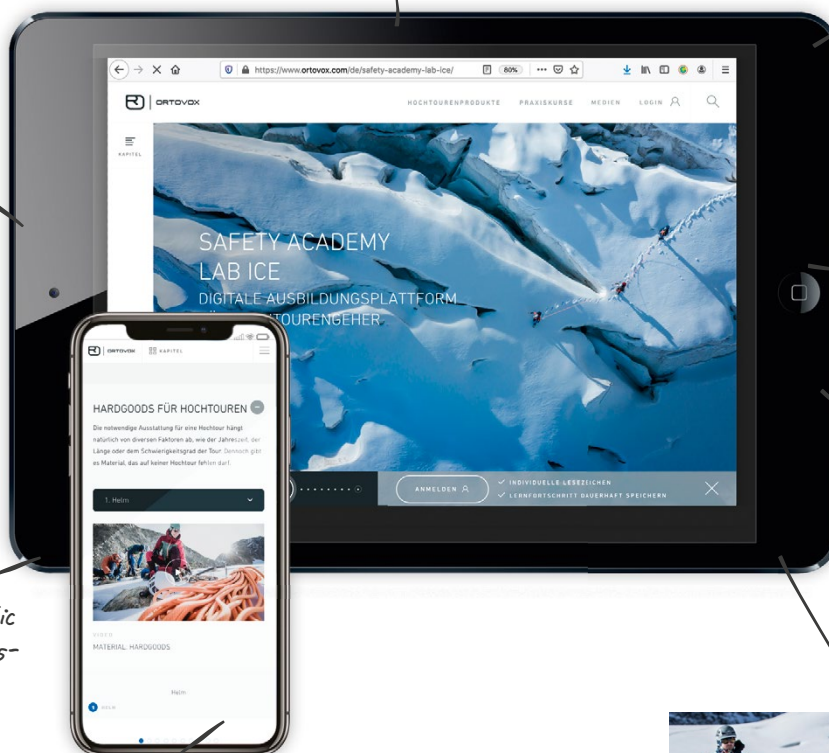

Walter Würtl:  
Alpine  
scientist

*3 main chapters for learning everything  
from alpine basics to crevasse rescue*

Chris Semmel:  
VDBS trainer

*18 video-  
tutorials*

*Professional  
know-how*

*Numerous specific  
pictures and illus-  
trations*

*Interactive  
e-Learning-exercises*

SHARE SPECIALIST KNOWLEDGE,  
PREVENT ACCIDENTS.

High alpine touring is one of the most fascinating but also one of the most demanding mountain sports. To go up in the mountain world, you need sound knowledge. **LAB ICE** follows on from our interactive, multimedia training platforms **LAB ROCK** and **LAB SNOW**, and includes text, images and over 18 video tutorials providing clear, informative introductions and training modules on equipment and safety aspects for high alpine tours.

LAB ICE — A COMPLETE COLLECTION. COMPLETE COMMUNICATION.  
WE PRODUCE AND PASS ON EXPERTISE.

On the landing pages of our website, on our social media channels and in our media work: With our comprehensive communication, we create clear brand awareness and position ourselves as experts when it comes to safety in the mountains – from our products to how to use them.

## SOUND EXPERTISE, PERFECTLY PREPARED – THREE EXAMPLES HOW TO INTEGRATE THIS INTO RETAIL-CHANNELS

### LANDING PAGE

Position yourselves as experts in the high alpine touring segment using our exciting texts, images and videos. They are available to download for free, so you can create your own individual teaching page for your customers.

### PRODUCT ADVISOR

Integrating our product advice videos and tutorials enables you to comprehensively present your high alpine touring equipment while simply and clearly demonstrating the right way to use it.

### SOCIAL

Use our content on your social media channels – we've ensured it's perfect for this purpose. Perhaps you could create a safety section that plays through the comprehensive LAB ICE content in chapters.

High rock faces, isolation, combined with long climbs – that is our world. We are **TRAINED ALPINISTS**, mastering multi-pitch routes with responsibility and a healthy approach to risk. Our rope team is characterized by friendship and trust. And we also have the **HIGHEST STANDARDS** when it comes to materials.

# PALA JACKET

The massive, bizarre towers of the Pala group protrude from the stony alpine plateau. Climbing here in the southernmost mountain range of the Dolomites takes strong nerves – and strong material. Our MERINO SHIELD TEC line was designed especially for such long, alpine routes. As in PALA PANTS, we use extremely **SCUFF-RESISTANT MATERIAL** in our PALA JACKET. In the Martindale test used to test scuff resistance, the primary material was able to withstand over 50,000 abrasion cycles. We've used **EVEN MORE ROBUST INSERTS** in high-stress areas (> 100,000 abrasion cycles in the Martindale test), to offer maximum protection from rugged rock faces. In addition, the MERINO SHIELD TEC line is made of polyamide and elastane on the outside and fine merino wool on the inside. This is a mix that guarantees **HIGH BREATHABILITY** and keeps up with each of your movements on the mountain thanks to the **4-WAY-STRETCH MATERIAL** and a sleeve fit that is perfectly adapted for climbing.

- **HIGH SCUFF RESISTANCE:**  
(> 50,000 abrasion cycles in the Martindale test)
- **4-WAY-STRETCH MATERIAL**
- **BREATHABLE**
- **LIGHTWEIGHT**
- **QUICK DRYING**
- **WATER-RESISTANT** thanks to DWR treatment
- **MERINO INSIDE**

# VAJOLET PANTS

Lightweight products can also be robust: The new VAJOLET PANTS combine both **LIGHTNESS** with **SCUFF RESISTANCE** and are at home on steep rock faces. The MERINO SHIELD ULTRA LIGHT line's thin, elastic main material guarantees the necessary **FREEDOM OF MOVEMENT** – for use during any demanding climb. Inserts made of scuff-resistant material also protect from rugged rock. We use a new wool elastic made from fine Tasmanian merino wool for the adjustable waistband, ensuring optimum **TEMPERATURE AND MOISTURE REGULATION**. These lightweight climbing pants are also **PFC-FREE** in the interest of sustainability. Other features such as the bonded map pocket or the pre-adjusted hem make the VAJOLET PANTS the perfect alpine companion – on the bizarre rock formations of the Vajolet towers in the Dolomites just as much as on the steep rock faces of the Wilder Kaiser.

- **HIGH SCUFF RESISTANCE**  
>30,000 abrasion cycles  
in the Martindale test
- **DURABLE** Thanks to a robust material blend

- **4-WAY STRETCH MATERIAL**
- **LIGHT**
- **QUICK DRYING**
- **WATER RESISTANT** Thanks to PFC-free DWR treatment

# 2.5L CIVETTA JACKET

Nothing but protection. Our revamped MERINO HARDSHELL LIGHT continues to impress thanks to the combination of extreme lightness ( $68 \text{ g/m}^2$ ) and its **HIGH-PERFORMANCE DERMIZAX® DT MEMBRANE** from Toray. The 2.5 layer construction features the water column (min. 20,000mm) of a hardshell and the lightness and breathability (min. 20,000  $\text{g/m}^2 / 24 \text{ h}$ ) of a windbreaker. The patented **MICRO BEAD STRUCTURE** on the interior provides long-term scuff resistance for the membrane underneath and feels comfortable on your skin thanks to the quick moisture wicking. New features such as the elastic waist and the chest pocket make the MERINO HARDSHELL even more functional: The jacket can now be **COMPLETELY STORED IN THE INNER POCKET** and, thanks to the loop on the inside, can be quickly fastened to a climbing harness or compressed to save space and stored in a backpack. The lightweight jacket is therefore the perfect companion on alpine tours where light weight, a small pack size and high protection are required.

- **WIND AND WATERPROOF**  
(min. 20,000 mm – 100 % windproof)
- **HIGH BREATHABILITY:**  
min. 20,000  $\text{g} / \text{m}^2 / 24 \text{ h}$
- **2-WAY MEMBRANE STRETCH**
- **NONPOROUS PU MEMBRANE:**  
long-lasting and easy to care for
- **PATENTED MICRO BEAD STRUCTURE:**  
ideal wear comfort on the skin
- **20 DEN HIGHTEC POLYAMIDE:** super fine and light
- **SMALL PACKING SIZE**
- **LIGHTWEIGHT:**  $68 \text{ g} / \text{m}^2$

# MERINO WINDBREAKER

Windproof, light as a feather and with all the benefits of the finest merino wool: MERINO PROTECT is the revolutionary combination of a lightweight windbreaker and a unique material blend: The material in the MERINO WINDBREAKER is made up of over **50 PER CENT FINE MERINO FIBERS**, providing extraordinary protection from wind and weather. Thanks to the high wool content, the material can regulate **MOISTURE AND TEMPERATURE LEVELS**, is odor neutralizing and comfortable on the skin. The additional DWR layer protects from light moisture. With additional features such as the self-adjusting hood, the elastic sleeve and seam cuffs or the ability to stow the windbreaker in the breast pocket, the MERINO WINDBREAKER is a protective all-rounder that will leave you in no doubt as to what the world's **MOST FUNCTIONABLE FIBER** is!

# SWISSWOOL PIZ DUAN JACKET

When it really starts to storm on an icy summit, that's when our SWISSWOOL PIZ DUAN line comes into its own. Whether a vest for ascents or a jacket for the summit, this line offers an unbeatable combination of **PROTECTION** and **INSULATION** while being very **LIGHTWEIGHT**. Thanks to a sophisticated processing technique for the lightweight 70g/m<sup>2</sup> SWISSWOOL lining, we have managed to take our insulating material to a whole new level: The specially developed material composition and particular production technology give the lining comfortable elasticity. PFC-free, elastic, breathable, wind-resistant TEC STRETCH is used as outer material to guarantee great **FREEDOM OF MOVEMENT AND EXCELLENT COMFORT**. The jacket and vest can also be completely packed away in the breast pocket and have loops for attaching with a carabiner. The SWISSWOOL PIZ DUAN line has an **EXCELLENT WEIGHT-TO-INSULATION RATIO**, which is especially useful during high alpine activities: whether on a high alpine tour in summer or a ski tour in winter.

## • SWISSWOOL

# PIZ SELVA SHORTS

Our SHIELD ULTRA LIGHT line is for solitary alpine summits – without superfluous features or unnecessary weight. Instead, the line concentrates on what's important: **MAXIMUM FREEDOM OF MOVEMENT** and **LIGHTNESS!** The PIZ SELVA SHORTS and PANTS accompany us on warm summer days, whether during fast mountain sprints or long alpine tours. The **ATHLETIC CUT** means the line fits perfectly, for moving quickly and safely through alpine terrain. We use a new elastic waistband made of Tasmanian merino wool for optimum temperature and moisture regulation: Thanks to the combination of elastane and merino wool, the light alpine pants don't just fit perfectly, they also provide the benefits of Tasmanian merino wool.

- **4-WAY STRETCH MATERIAL**
- **HIGH SCUFF RESISTANCE**

# BRENTA SHORTS

Robust, breathable and full freedom of movement: The MERINO SHIELD LIGHT line combines everything required for a **DEMANDING ALPINE TOUR**. The material mix withstands more than 100,000 abrasion cycles in the Martindale test, which measures scuff resistance, and is one of the most durable of ORTOVOX materials. Thanks to a narrow cut and **EXTREMELY ELASTIC MATERIAL**, these mountain pants ensure an ideal fit with sufficient freedom of movement in any situation. In addition, merino mesh inserts in the waistband provide the necessary comfort. Features such as adjustable ankle cuffs, anatomically shaped knee, hook-adjustable waistband and seamless, bonded laser-cut details make our BRENTA PANTS and SHORTS **TECHNICAL ITEMS** of **MOUNTAIN APPAREL**.

- **DURABLE** Thanks to the material mix (> 100,000 abrasion cycles in the Martindale test)
- **GREAT FREEDOM OF MOVEMENT**
- **BREATHABLE**
- **QUICK DRYING**
- **WATER-RESISTANT** Thanks to DWR treatment

# PELMO PANTS

Our classic: Thanks to their cut, design and use of SHIELD ZERO material, our PELMO PANTS are ready for any demanding vertical meter. These pants are tighter at the legs and seams and have an anatomically shaped knee area that makes these light, alpine mountain pants **FIT PERFECTLY**. The PELMO shorts have been rejuvenated: These short mountain pants are now even sportier. In the interest of sustainability, both are now PFC-free. **DURABLE MATERIAL, HIGH BREATHABILITY** and **LIGHT WEIGHT** are all still guaranteed. Merino mesh inserts in the waistband ensure maximum comfort in the right areas.

- **GREAT FREEDOM OF MOVEMENT**
- **MORE DURABLE** - min. 30,000 abrasion cycles in the Martindale test
- **BREATHABLE**

- **QUICK DRYING**
- **WATER-REPELLENT** Thanks to PFC-free DWR treatment

# ENGADIN PANTS

The SHORTS and PANTS in the MERINO SHIELD VINTAGE line are at home in alpine regions – from the Bavarian Prealps to the rugged summits of the Dolomites. The elastic, sustainably-produced **ORGANIC COTTON** gives the ENGADIN SHORTS and PANTS the required freedom of movement. And because long alpine tours place high demands on the material, the ENGADIN SHORTS and PANTS are **ROBUST AND DURABLE**: The cotton blend can withstand at least 120,000 abrasion cycles in the Martindale test, which measures scuff resistance.

- **ORGANIC COTTON**
- **DURABLE MATERIAL MIX**  
(min. 120,000 abrasion cycles in the Martindale test)
- **2-WAY STRETCH MATERIAL**
- **WATER RESISTANT** Thanks to DWR treatment
- **BREATHABLE**

# ROLE MODEL FOR OTHER MERINO FARMERS

## WILL BENNETT: MERINO FARMER AND PIONEER

Since 1853, the Bennett family has lived in the Tasmanian midlands with their merino sheep. Will Bennett, a fifth generation sheep farmer, runs the Ashby farm and was one of the first farmers to fully commit to our strict **ORTOVOX WOOL PROMISE**. Will is following his inner voice and is a role model for other merino farmers today. Discover Will's Story on [ortovox.com](https://ortovox.com)

# THE FOUR PILLARS OF OUR ORTOVOX WOOL PROMISE

## 01 PERSONAL RELATIONSHIPS

It was not easy to find farmers who wanted to take the OWP path with us. Today, our small team of sheep farmers is all the stronger and more committed – and we are all the more impressed by and excited about them and their products. Our cooperation is close and friendly, and by working together this way we gain new strengths that can really make a difference.

## 02 NO MULESING

Animal protection is extremely important and we naturally (in every sense of the word) consider it a duty of ours. For our OWP we have defined 64 points which guarantee that our sheep really thrive. One of the most important of these is refraining from practices like mulesing, which cause unnecessary pain and stress.

## 03 PROTECTING NATURE

Wool is a natural fiber and therefore a holistic product. Soil, water, grass – our wool is a part of the natural cycle. Our farmers practice sustainable agriculture in order to provide the ideal conditions for both humans and animals, today and for generations to come.

## 04 TRANSPARENCY ALL THE WAY TO THE SOURCE

We can follow the development of our products all the way back to their source: the sheep farms in Tasmania. Transparency and the monitoring of the complex delivery chain are a real challenge, but at the same time are a real labor of love. It is also important to us to introduce the people who are at the beginning of it all: our farmers – the producers of our clean wool.

# MERINO ASHBY SHIRT LONG SLEEVE

In the eastern highlands of Tasmania is Ashby Farm, with 20,000 merino sheep, 2,800 hectares of land, and the Bennett family, who have been running the farm for five generations. Inspired by their boundless passion for sheep and the land, the MERINO HERITAGE line is an homage to the fine merino wool: The casual cut MERINO ASHBY SHIRTS made from merino wool and organic cotton are functional classics that provide the **RIGHT MICROCLIMATE AND MAXIMUM WEAR COMFORT**, whether on the mountain, in the valley or even on a sheep farm at the other end of the world. The shirts are **ROBUST** thanks to an innovative spinning process: With BETA-SPUN technology, fine polyamide filaments are spun around a merino wool core. This makes the material tear and scuff resistant – without losing the benefits of fine wool fibers. Additional reinforcements on the shoulders and the elbow region protect the shirts from scuffs.

- **HIGH BREATHABILITY**
- **DURABLE MATERIAL MIX**
- **BETA-SPUN TECHNOLOGY BY THE © SÜDWOLLE GROUP**

# MERINO FLEECE LIGHT GRID JACKET

On long days spent climbing, we need lightweight material that we can completely rely on. That's why we have the highest standards when it comes to our equipment: The FLEECE LIGHT GRID line is tailored to the needs of mountaineers who require **MINIMUM WEIGHT** and **INSULATION** together with **VENTILATION**. The fleeces are particularly light, yet still provide the necessary protection in cooler temperatures thanks to the inside channel structure. The Tasmanian merino wool on the inside also regulates **MOISTURE AND TEMPERATURE LEVELS**. And the shoulder and elbow areas are reinforced so that there is sufficient **SCUFF PROTECTION**, even during demanding climbs.

- **MERINO ON SKIN**
- **LIGHT**
- **HIGH BREATHABILITY**

# MERINO FLEECE GRID HOODY

On alpine adventures our equipment must be lightweight but also warm and functional. It must function in the valley just as it does during ice cold climbs to the summit. The FLEECE GRID line is thus the ideal companion in the mountains: Thanks to its inner **CHANNEL STRUCTURE**, this fleece jacket is light but can also **TRAP AIR AND HEAT** through insulating air pockets. A Fleece Light insert in the chest area and double-layered breast pocket provide additional lightweight protection against the wind. During hours of intensive movement, the material composition boasts **EXCELLENT STRETCHABILITY** and provides ventilation thanks to its inner channel structure. The temperature-regulating properties are supported by fine merino wool on the inside: **TASMANIAN VIRGIN WOOL** regulates the moisture and temperature levels, is quick drying and has odor neutralizing characteristics.

- **MERINO ON SKIN**
- **LIGHT**
- **HIGH BREATHABILITY**

# MERINO FLEECE LIGHT HOODY

Whether we're climbing, on an alpine tour or mountaineering – we like companions that do everything with us. That's why our MERINO FLEECE LIGHT line is **DURABLE, LIGHTWEIGHT** and, thanks to the fine **TASMANIAN MERINO WOOL**, comfortable on the skin. Technical features such as backpack-compatible front pockets, bonded frame and thumb loops make the simple MERINO FLEECE LIGHT hoodies and jackets an ideal second layer, regardless of the season. Fine Tasmanian merino wool and inner waffle structure ensure good moisture wicking and feel dry on the skin during arduous activities. The material is also extremely breathable, **QUICK DRYING** and **HIGHLY STRETCHABLE**. The outside is **SMOOTH**, so the material provides less contact surface.

- **MERINO ON SKIN**
- **HIGH BREATHABILITY**

# PRESERVE THE LAST WILDERNESS

PHOTO Rob Blakers

## THE TARKINE / TAKAYNA RAINFOREST

In northwest Tasmania lies one of the oldest, most uniquely diverse forests in the world, covering almost 495,000 hectares: the Tarkine / takayna. Today, this 60-million-year-old rainforest is under severe threat from large-scale clearances for the mining and logging industries.

SAVE MY  
HOMELAND!

Tasmania is home to our merino farmers – and it's ORTOVOX's second home, too. It's the wild, untamed landscape that is responsible for the high quality of our merino wool.

# SAVE THE TARKINE

THE DESTRUCTION OF ONE OF THE OLDEST, MOST UNIQUELY DIVERSE RAIN-FORESTS IN THE WORLD IN THE HOME OF OUR MERINO SHEEP FARMERS MOVES US DEEPLY – AND AFFECTS US ALL.

PHOTO: Rob Flakers

ProtACT  
2024

Protection, friendship, responsibility and sustainability are our fundamental values. They are the basis for our ambitious sustainability strategy, ProtACT2024, which we will be implementing between now and 2024. The protection of regional uniqueness is one of our central ambitions – here at home and on the other side of the world.

Download the story package from the mediaroom on [ortovox.com](https://ortovox.com), available end of october 2020

150 COOL LEAVES TS W

# TAKE ACTION

Two styles from our t-shirt collection are dedicated to the Tarkine and are available exclusively from our specialist dealers. We are supporting sales with POS measures and online campaigns. For every t-shirt purchased we will donate 5% to the Bob Brown Foundation, which is committed to the conservation of the rainforest.

120 COOL TEC  
WOOD T-SHIRT

## ACTIVE SINCE 2012 FOR THE PROTECTION OF THE TARKINE — THE BOB BROWN FOUNDATION

Tasmanian Bob Brown is one of Australia's most important environmental activists. For years, his foundation has been battling the rapid destruction of the Tarkine due to large-scale deforestation for the mining and logging industries. In addition to its political activities, the Foundation organizes and finances local projects and protests. ORTOVOX supports this foundation through donations.

Bob Brown - has been campaigning for the protection of the Tarkine since the late 1970s.

## AN INNER VOICE FOR FUTURE GENERATIONS

Portaledge inventor and climbing legend John Middendorf emigrated from the USA to Tasmania. The teacher and family man was urged by his inner voice to act: He wants to protect one of the last wild places on earth for future generations. Activists use John's portaledges to hang in trees to prevent them from being felled. He's done this himself seven times. ORTOVOX supports this environmentalist with equipment and clothing.

John Middendorf - From the Big Walls in Yosemite to the trees of the Tarkine

# 120 COOL TEC WOOD T-SHIRT

**FAST FORWARD, FAST UPWARD:** With the 120 MERINO COOL TEC line, you'll be prepared for any height. The sporty 120 COOL TEC shirts complement our line for warm days. A slightly longer fit ensures the shirt sits optimally during intense activity. In addition, the fine Raglan seam prevents chafing when wearing backpacks. As with the other products in this line, the material mix of our 120 COOL TEC shirts stands for pure functionality: The combination of fine **MERINO FIBERS** and **TENCEL® CELLULOSE FIBERS** of botanic origin is **SELF-COOLING** and **DURABLE** thanks to CORESPUN TECHNOLOGY. This is due to a complicated process in which the fine merino and Tencel® fibers are spun around a core of polyamide filaments. The resulting yarn is used to produce a material that has the same benefits as Merino wool and Tencel®, and is even more **ROBUST**.

# 120 TEC MOUNTAIN TSHIRT

The alpine summer is calling! With new mountain prints, the t-shirts from the 120 MERINO TEC line are ready for rugged summits and steep rock faces. The tried-and-tested yarn construction continues to guarantee the necessary stability and scuff protection: The material is **EXTREMELY LIGHTWEIGHT** and at the same time **VERY DURABLE** thanks to the CORESPUN TECHNOLOGY BY THE © SÜDWOLLE GROUP. In this spinning process, soft Tasmanian merino fibers with a fiber diameter of 17.5 microns are spun around a core of polyamide filaments. This creates a yarn that can be used to produce materials that are **THIN, LIGHTWEIGHT** and **ELASTIC**, yet **EXTREMELY ROBUST** and **STURDY** at the same time. In addition, the Tasmanian wool creates a proven microclimate and wear comfort.

- **CORESPUN TECHNOLOGY BY © SÜDWOLLE GROUP:**  
(For increased stability)
- **EXTREMELY LIGHTWEIGHT**
- **DURABLE**

- **LONG LASTING**
- **ELASTIC**
- **QUICK DRYING**
- **NO ODORS:** 85 % merino wool neutralizes odors

OUR  
STRONGEST  
MERINO  
OF ALL TIME

## BETA-SPUN TECHNOLOGY

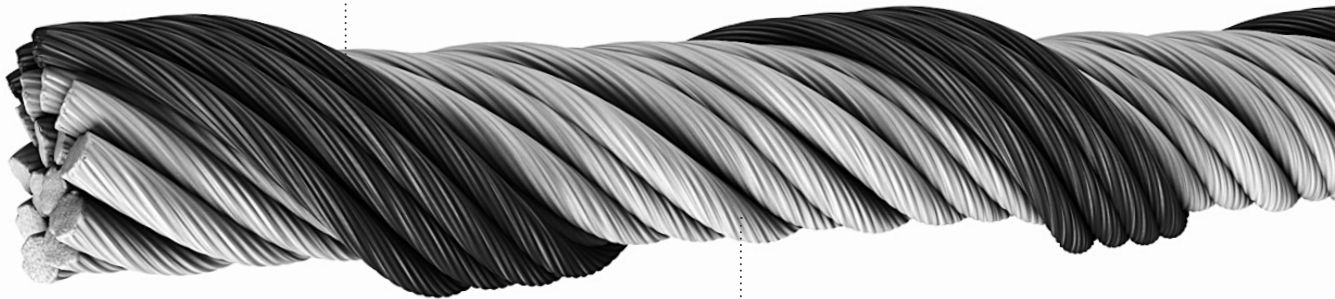

Robust, tear resistant and with all the benefits of the finest Tasmanian merino wool: With **BETA-SPUN TECHNOLOGY FROM SÜDWOLLE® GROUP**, our merino wool is now even more abrasion resistant and high performance. In this new spinning process, fine polyamide filaments are spun around a merino wool core. With this protective polyamide coat, the yarn is now over **70 PERCENT MORE TEAR RESISTANT** than conventional merino yarn. Thanks to the elaborate spinning process, you can also feel the fine merino fibers on your skin – providing all the benefits of natural merino wool!

### MERINO WOOL IS ...

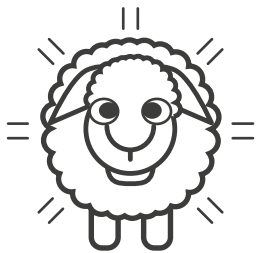

- **ODOR** neutralizing
- **MOISTURE** regulating
- **TEMPERATURE** regulating
- **SOFT**
- **EASY** to care for
- **SUSTAINABLE** raw material

**FOR PROTECTION:  
A POLYAMIDE COAT**

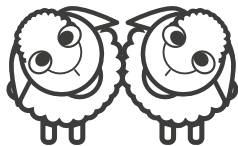

**IN THE CORE: FINEST  
MERINO WOOL**

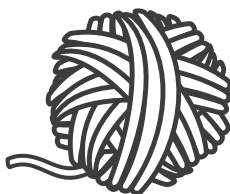

### 70 % MORE TEAR RESISTANT

The use of fine polyamide filaments spun around a merino fiber core makes the yarn over 70 percent stronger than conventional merino yarn.

### MORE ABRASION RESISTANT

The protective polyamide coat doesn't just ensure improved tear resistance, it also makes the yarn more abrasion resistant.

### FINE YARN

The spinning technique creates a yarn so fine that it can be used to make extremely light yet robust materials.

Our strongest Merino can be found in our **150 MERINO COOL** Line.

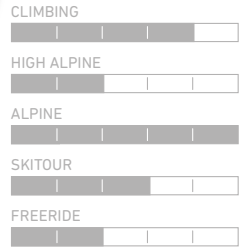

# 150 COOL LEAVES T-SHIRT

New yarn, tried-and-tested functionality and sustainable cooling: Using BETA-SPUN technology, we have succeeded in providing our popular 150 MERINO COOL line with even more **STABILITY**. The newly designed 150 MERINO COOL shirts and tops are now stronger and more robust – without sacrificing the cooling effect of TENCEL™. BETA-SPUN technology from the SÜDWOLLE GROUP refers to a new spinning process in which a generous number of fine polyamide filaments are spun around a core of merino wool and Tencel™. The material is more **SCUFF** and **TEAR RESISTANT** thanks to the protective polyamide outer layer, while maintaining the benefits of natural merino and Tencel™ fibers. With this line you're perfectly equipped, for either alpine tours or long alpine climbs.

# 120 COMPETITION LIGHT LONG SLEEVE

**LIGHT WEIGHT, FUNCTION** and the best TASMANIAN MERINO WOOL for the NAKED SHEEP: To follow the award-winning 230 MERINO COMPETITION, we have developed the 120 MERINO COMPETITION line for high-performance sport. The line, which contains a high proportion of merino wool, is now even **LIGHTER** and is perfect for high-action sports – in both summer and winter! The 120 MERINO COMPETITION is also produced using an almost **SEAMLESS** circular knitting to place **DIFFERENT MATERIAL STRENGTHS** at different areas of the body. The main zones are made from fine **120 g/m<sup>2</sup> MERINO**, and particularly breathable mesh structures are used in spots that get more heated. And thanks to the cool 3-color design, the NAKED SHEEP is always stylish!

# 185 ROCK'N'WOOL SHORT SLEEVE

**COLOR WOOL!** Inspired by the special grain of our primary rock, granite, we have given our 185 MERINO ROCK'N'WOOL line a completely new look. The **NEW LOOK** is achieved by twirling together two different colored yarns to create a **SPECIAL COLORING**. The material remains the same: 100 % fine Tasmanian merino wool. The material strength of 185 g/m<sup>2</sup> covers a wide temperature range, regulates moisture and keeps odors under control, making it the **IDEAL FIRST LAYER FOR ALL MOUNTAINEERS**.

- **PURE MERINO WOOL**, 185 g/m<sup>2</sup>
- **FINE 19-MICRON FIBER DIAMETER**
- **NO SCRATCHING** High wear comfort
- **SUSTAINABLE RAW MATERIAL** Our sheep are shorn once or twice a year.

## BALANCED COMPRESSION

The compression effect of our ALPINIST PRO COMPRESSION MID sock is **DISTRIBUTED EQUALLY FROM THE ANKLE TO THE CALF**. This construction **SUPPORTS THE MUSCLES** and **PROTECTS AGAINST FATIGUE**. During ascent, but also during descent, our calf muscles have to absorb numerous knocks and vibrations. The muscles are placed under continuous stress and can quickly fatigue. Balanced compression can slow this effect.

# TOUR COMPRESSION LONG SOCKS

AREA OF USE

CLIMBING

HIGH ALPINE

ALPINE

SKITOUR

FREERIDE

**ERGONOMICALLY  
OPTIMIZED  
RIGHT / LEFT FIT**

**FLAT BODY CONSTRUCTION**  
Crease and pressure-free fit.

**REINFORCED HEEL  
AND TOE AREA**  
Reinforced for  
greater longevity.

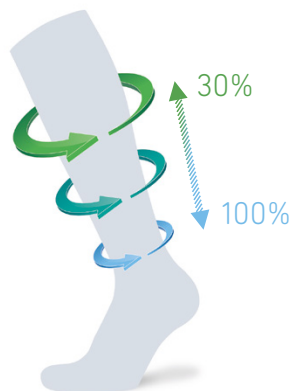

**360° WEBBING SYSTEM**  
For improved breathability.

**ELASTIC CUFF**  
Non-slip fit.

**GRADUATED  
COMPRESSION SYSTEM**  
Compression according to CEN  
standard (Class 1, mild  
pressure, 15–21mmHg) ensures  
improved oxygen and nutrient  
provision to the muscles and  
thereby supports improved  
performance.

**ANKLE STABILIZATION  
ZONE**  
Fixes the sock and  
prevents slipping.

**FLAT TOE SEAM**  
Prevents chafing  
and blisters.

## GRADUATED COMPRESSION

The compression function of our TOUR COMPRESSION LONG sock is in line with the European CEN standard and provides class 1 compression (mild pressure, 15–21mmHg). This means the **COMPRESSION EFFECT** is **HIGHER AT THE ANKLE THAN IN THE CALF AREA**. Compression **HELPS THE VEINS TO CARRY** low-oxygen, high-lactate **BLOOD BACK TO THE HEART** and replace this with fresh blood. In this way provision to the muscles can be improved and premature fatigue prevented.

For improved breathability.

### ERGONOMICALLY OPTIMIZED RIGHT / LEFT FIT

### COMPACT MERINO YARN BY ©SÜDWOLLE GROUP

At 21.5 microns in thickness, merino yarn is elastic, stable and pleasant on the skin.

### FULL TERRY LINING

Knitting stitches serve to trap air, protecting feet from the cold.

### ANKLE AND ARCH SUPPORT

Ensures slip-free fit and prevents creasing.

### FLAT TOE SEAM

Prevents chafing and blisters.

# HIGH ALPINE GLOVE

Our HIGH ALPINE GLOVES are the ideal for demanding days on high mountain terrain. These **WIND AND WATERPROOF** high alpine touring gloves with **O-SHIELD** membrane are particularly robust and scuff resistant: The back is reinforced with recycled 60 g/m<sup>2</sup> merino wool padding, while goatskin leather with protected seams makes the palm particularly **DURABLE**. The reinforced index finger and thumb also protect against wear from using poles, ropes and ice axe. On the inside, soft **MERINO WOOL** feels good on the hands and naturally guarantees a comfortable temperature – even in cold, high alpine terrain.

- **SCUFF RESISTANT**
- **WIND AND WATERPROOF**
- **RECYCLED WOOL PADDING**
- **GOATSKIN LEATHER**
- **100 % MERINO ON YOUR SKIN**

# SWISSWOOL CLASSIC

We discovered **CLASSIC MILLED WOOL FOR THE FIRST TIME** in **1988** and have stuck with it ever since. Our gloves and socks are worn on both small and large mountains, when ski touring and freeriding in winter and on alpine tours in summer. Why? Because wool can **PROVIDE WARMTH EVEN WHEN WET** and therefore offers **EXTRA SAFETY** against the cold.

Our **SWISSWOOL CLASSIC WOOL** gloves are made from fair-trade Swiss wool. The virgin wool is characterized by its outstanding thermal properties and excellent climate control, as well as its **SUSTAINABLE REGIONAL ORIGIN** – making it perfect for our warming glove line.

# MATERIALS GLOSSARY

### 3<sup>RD</sup> LAYER MERINO SHIELD ULTRA LIGHT

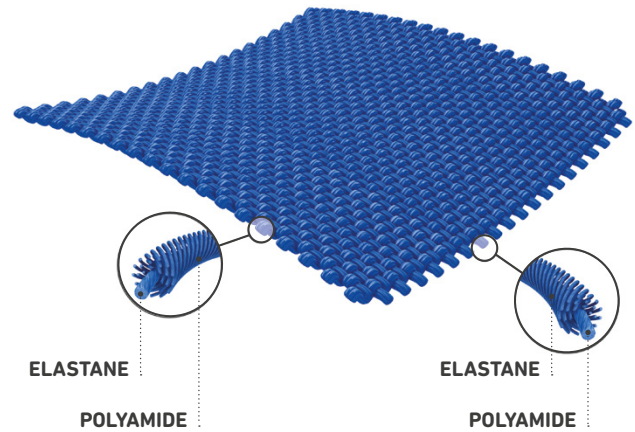

Fast and light on-the-go: The MERINO SHIELD ULTRA LIGHT line's main material is made of polyamide and elastane. This material mix provides great freedom of movement and is one of the lightest fabrics that ORTOVOX uses in their PANTS and SHORTS. The MERINO SHIELD ULTRA LIGHT line is water-resistant thanks to DWR treatment.

#### SPECIFICATIONS

Weight: 135 g/m<sup>2</sup>  
 Abrasion resistance: 30,000 abrasion cycles in the Martindale test

#### MATERIAL COMPOSITION

85 % polyamide  
 15 % elastane

### 3<sup>RD</sup> LAYER MERINO SHIELD TEC

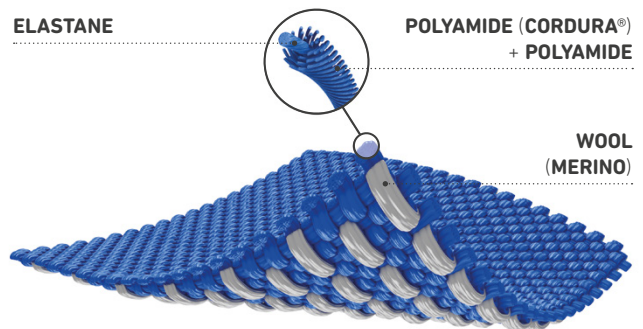

Like in the MERINO SHIELD SHELL, ORTOVOX uses Cordura® in the MERINO SHIELD TEC collection to make the material exceptionally abrasion-resistant and robust. In addition to Cordura®, the material also consists of soft merino wool on the inside, elastane, and polyamide. A mixture that provides high levels of elasticity and breathability.

#### SPECIFICATIONS

Weight: 175 g/m<sup>2</sup>  
 Abrasion resistance: min. 50,000 abrasion cycles in the Martindale test

#### MATERIAL COMPOSITION

Main material: 64 % polyamide (Cordura®)  
 15 % wool (MERINO)  
 11 % elastane  
 10 % polyamide

### 3<sup>RD</sup> LAYER SHIELD CANVAS LIGHT

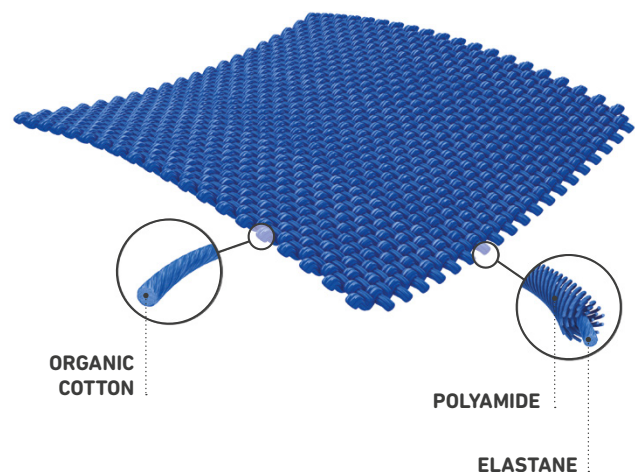

For the SHIELD CANVAS LIGHT, ORTOVOX has combined organic cotton with polyamide and elastane. This material mix makes the line breathable, robust and elastic – all at the same time. The cotton used is organically grown and certified.

#### SPECIFICATIONS

Weight: 150 g/m<sup>2</sup>

#### MATERIAL COMPOSITION

70 % organic cotton  
 25 % polyamide  
 5 % elastane

**3<sup>RD</sup>**  
LAYER

## SWISSWOOL

Born out of a pioneering spirit and shaped by our innovative strength, ORTOVOX introduced the first SWISSWOOL® products in 2011 – and simultaneously created a new segment of insulating wool products! It is characterized by the functionality of the natural fibers and the sustainable, regional production and processing of the wool.

### SPECIFICATIONS

Weight (Filling material):

60 g/m<sup>2</sup> (SWISSWOOL®)

70 g/m<sup>2</sup> (SWISSWOOL®)

### MATERIAL COMPOSITION

SWISSWOOL:

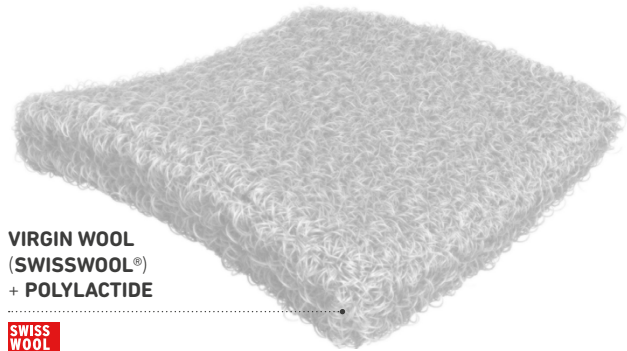

88 % virgin wool

12 % polylactide (corn based)

SWISSWOOL TEC STRETCH:

70 % virgin wool

30 % polylactide (corn based)

**VIRGIN WOOL**  
(SWISSWOOL®)  
+ POLYLACTIDE

**3<sup>RD</sup>**  
LAYER

## 3L SHELL

Functional and absolutely robust in all conditions: The 3L SHELL material with Dermizax® NX membrane by Toray offers reliable protection against wind and water or rock contact and is at the same time particularly breathable (up to 25,000 g/m<sup>2</sup>/24h). The non-porous construction of the PU membrane increases the water vapour permeability the more you sweat.

### SPECIFICATIONS

Weight: 158 g/m<sup>2</sup>

Water column: min. 20,000 mm

Breathability: up to 18,000 g/m<sup>2</sup>/24 h

Wind protection: 100 % windproof

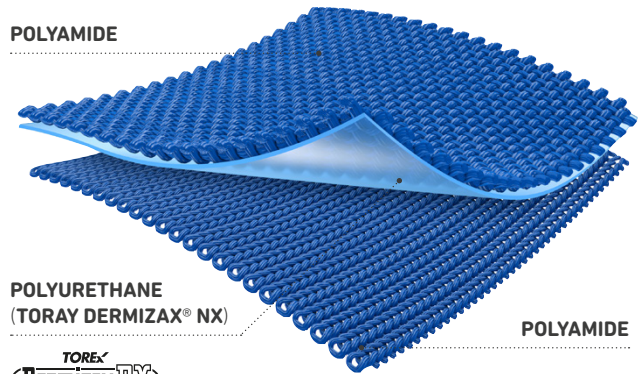

### MATERIAL COMPOSITION

Outer material: 100% polyamide

Membrane: 100% polyurethane  
(Toray Dermizax® NX)

Inside: 100% polyamide

POLYAMIDE

POLYURETHANE  
(TORAY DERMIZAX® NX)

## 3L SHELL LIGHT

Con la membrana Dermizax® NX di Toray il materiale SHELL LIGHT A TRE STRATI assicura la massima protezione del vento e dall'acqua nonché un'eccellente azione traspirante (min. 25.000 g/m<sup>2</sup>/24h) con un peso decisamente ridotto (82 g/m<sup>2</sup>). Non viene impiegato alcun PTFE, ma materiale PU riciclabile e grazie alla struttura priva di pori della membrana aumenta la permeabilità al vapore acqueo a seconda dell'intensità della traspirazione.

### SPECIFICATIONS

Weight: 82 g/m<sup>2</sup>

Water column: min. 20,000 mm

Breathability: min 25,000 g/m<sup>2</sup>/24 h

## MERINO PROTECT

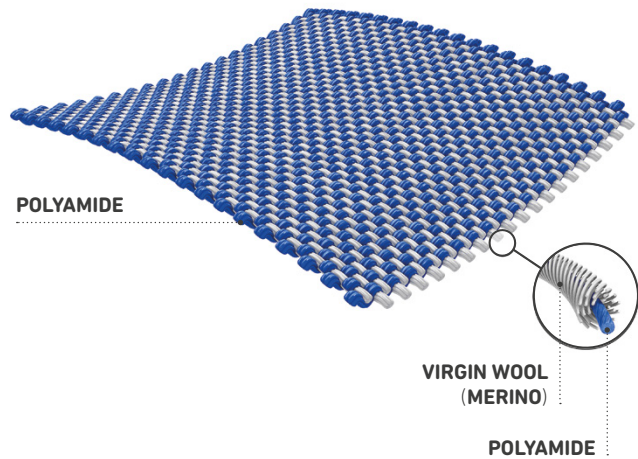

Windproof, light and with all the benefits of fine merino wool: For our MERINO PROTECT line we use an innovative mix of materials that is completely windproof and comprises over 50 percent fine merino fibers. Thanks to the high wool content, the material can regulate moisture and temperature levels, is odor neutralizing and comfortable on the skin. The weave also provides complete protection from the wind. A DWR finish is also used to make the material water-resistant.

### SPECIFICATIONS

Weight:	59 g/m <sup>2</sup>
Wind protection:	100 % windproof
Abrasion resistance:	120,000 abrasion cycles in the Martindale test

### MATERIAL COMPOSITION

55 % virgin wool (MERINO)
45 % polyamide

**3<sup>RD</sup>**  
LAYER

## MERINO HARDSHELL LIGHT

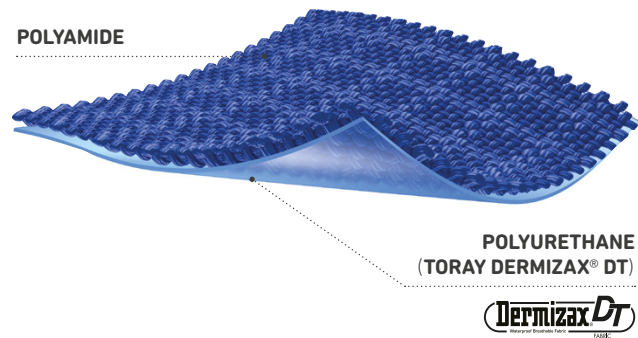

The protection of a hardshell and the lightness and breathability of a windbreaker: The MERINO HARDSHELL LIGHT impresses with its combination of extreme lightness (68 g/m<sup>2</sup>), minimal pack size, high-performance Toray Dermizax® DT and a patented micro bead structure on the inside.

### SPECIFICATIONS

Weight:	68 g/m <sup>2</sup>
Water column:	min. 20,000 mm
Breathability:	min. 20,000 g/m <sup>2</sup> /24 h
Wind protection:	100 % windproof

### MATERIAL COMPOSITION

Outer material:	100% polyamide
Membrane:	100% polyurethane (Toray Dermizax® DT)

**3<sup>RD</sup>**  
LAYER

## MERINO TEC SKIN

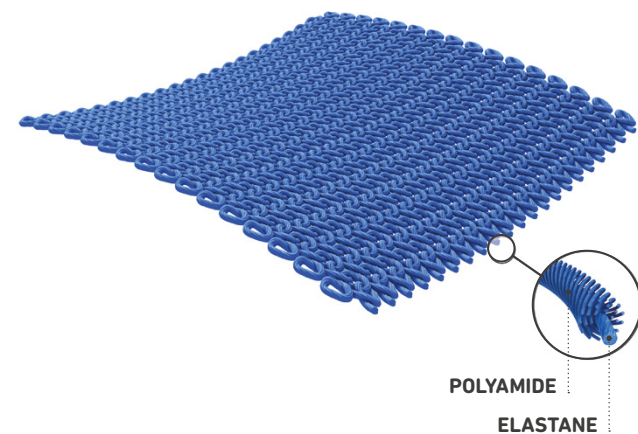

In the MERINO TEC SKIN line, a material mix of polyamide and elastane provides an optimum fit with sufficient freedom of movement. In this yarn, which is used for knitting, the polyamide forms the outer layer while elastane is the core. This means the yarn is tear-resistant, elastic and returns to its original shape quickly during intense movement.

### SPECIFICATIONS

Weight:	210 g/m <sup>2</sup>
---------	----------------------

### MATERIALKOMPOSITION

78 % polyamide
22 % elastane

### 3<sup>RD</sup> LAYER MERINO SHIELD LIGHT

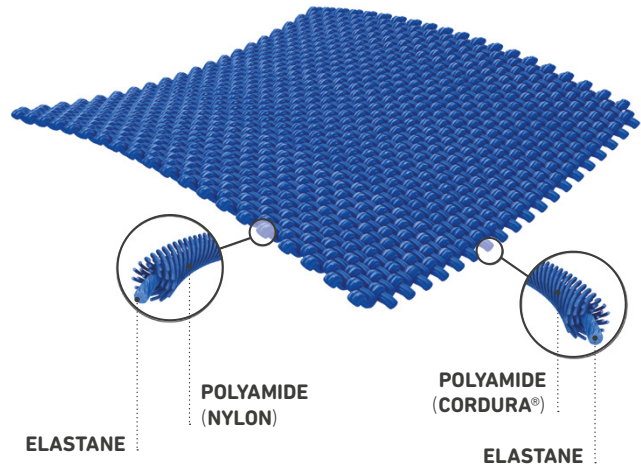

One of ORTOVOX's most durable materials: Thanks to its composition, the line is one of ORTOVOX's most durable materials: It manages 100,000 abrasion cycles in the Martindale Test. The fabric is robust, lightweight and provides protection in mountain terrain.

#### SPECIFICATIONS

Weight: 163 g/m<sup>2</sup>  
 Abrasion resistance: min. 100,000 abrasion cycles in the Martindale test

#### MATERIAL COMPOSITION

Main material: 61 % polyamide (Cordura®)  
 29 % nylon  
 10 % elastane

### 3<sup>RD</sup> LAYER MERINO SHIELD ZERO

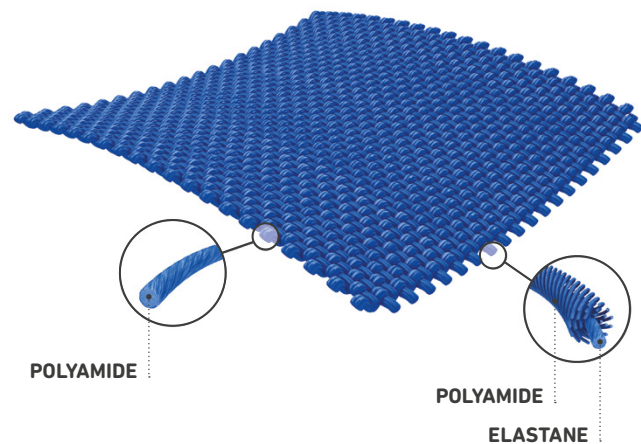

Protection and low weight: For the MERINO SHIELD ZERO collection, ORTOVOX uses a mix of nylon and elastane in the main material. This makes the material exceptionally light and breathable, and at the same time extremely elastic and robust. The MERINO SHIELD ZERO line is water-resistant thanks to DWR treatment.

#### SPECIFICATIONS

Weight: 151 g/m<sup>2</sup>  
 Abrasion resistance: min. 30,000 abrasion cycles in the Martindale test

#### MATERIAL COMPOSITION

Main material: 93 % polyamide  
 7 % elastane

### 3<sup>RD</sup> LAYER MERINO SHIELD VINTAGE

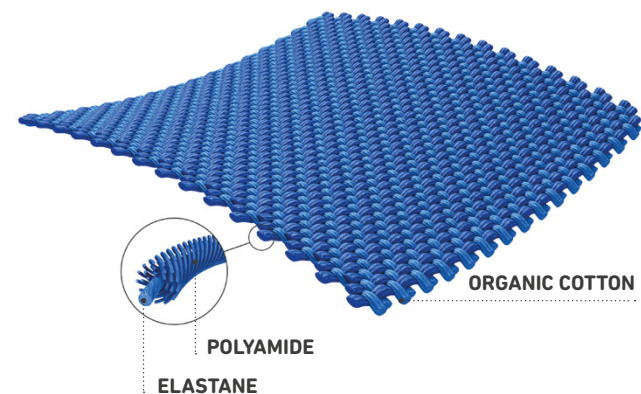

MERINO SHIELD VINTAGE stands for a symbiosis of organic cotton, polyamide and elastane. The elastic material mix provides freedom of movement and makes the line both breathable and robust. The cotton used is also sustainable, organically grown and certified.

#### SPECIFICATIONS

Weight: 187 g/m<sup>2</sup>  
 Abrasion resistance: 120,000 abrasion cycles in the Martindale test

#### MATERIAL COMPOSITION

Main material: 66 % Organic Cotton  
 29 % polyamide  
 5 % elastane

## 2<sup>ND</sup> LAYER MERINO NATURETEC RIBS

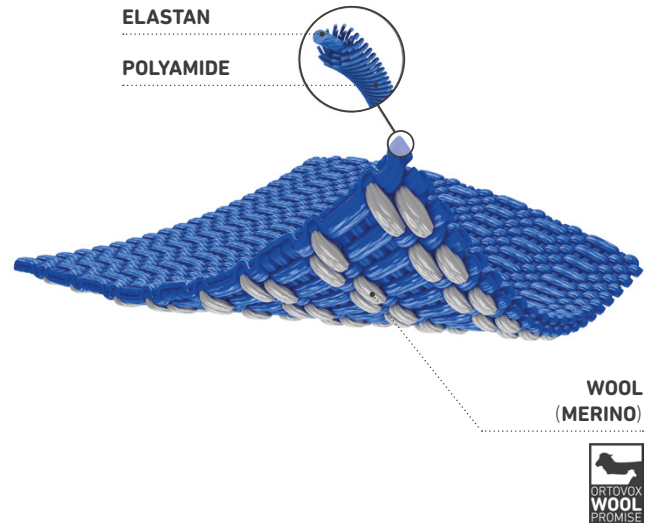

The extreme robustness and abrasion resistance of the MERINO NATURETEC RIBS material is demonstrated in the Martindale test, in which it achieves 100,000 abrasion cycles. Nevertheless, it feels pleasantly soft and offers excellent stretch qualities for great freedom of movement. Thanks to the exclusion of a membrane (the merino wool is woven directly into the schoeller® fabric), it is also highly breathable.

### SPECIFICATIONS

Weight:	170 g/m²
Water column:	water resistant
Wind protection:	wind resistant
Abrasion resistance:	100,000 abrasion cycles in the Martindale test

### MATERIAL COMPOSITION

75 % polyamide
18 % wool (MERINO)
7 % elasthan

## 2<sup>ND</sup> LAYER MERINO HERITAGE

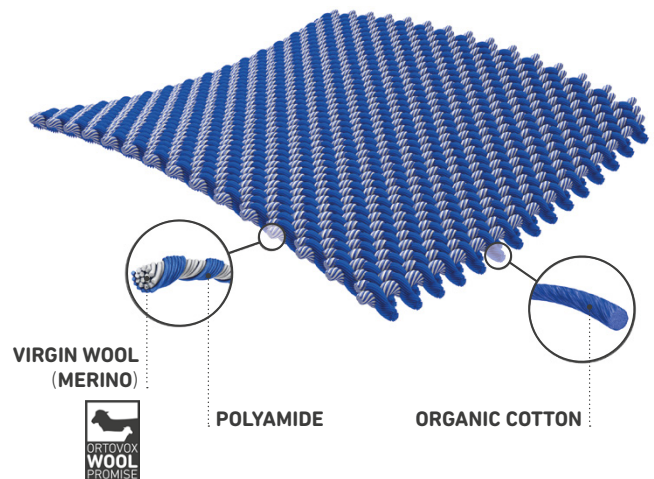

A homage to one of the world's finest fibers: Tasmanian merino wool! Thanks to a combination of Tasmanian merino wool and organic cotton, the MERINO HERITAGE material provides ideal temperature management and comfort. The fabric is robust thanks to BETA-SPUN technology: A spinning process where polyamide fibers are spun around a merino wool core. This means the fabric is extremely scuff-resistant yet also light. You can also feel the fine merino fibers on your skin – and experience all the benefits of natural merino wool.

### SPECIFICATIONS

Weight:	147 g/m²
Abrasion resistance:	38,000 abrasion cycles in the Martindale test

### MATERIAL COMPOSITION

Main material:	55 % Organic Cotton
	39 % virgin wool (MERINO)
	6 % polyamide

## 2<sup>ND</sup> LAYER MERINO FLEECE LIGHT

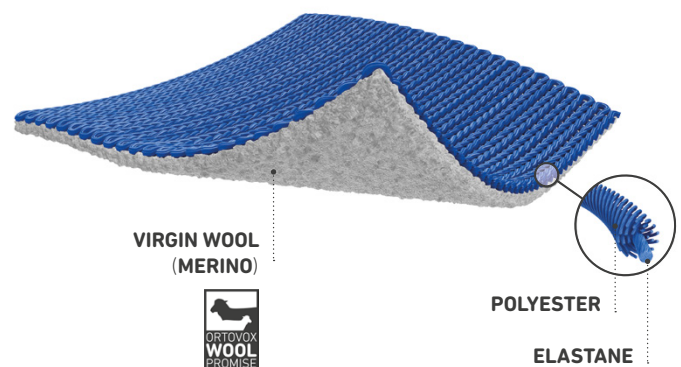

In the MERINO FLEECE lines, ORTOVOX uses the finest Merino wool on the inside together with polyester on the outside. Elastane is also used to make the material elastic. This makes the line very stretchy and durable, while the napped Merino wool used in the lines provides an excellent microclimate and breathability.

### SPECIFICATIONS

Weight:	205 g/m²
---------	----------

### MATERIAL COMPOSITION

64 % polyester
27 % virgin wool (MERINO)
9 % elastane

2<sup>ND</sup>  
LAYER

## MERINO FLEECE GRID

### MERINO FLEECE LIGHT GRID

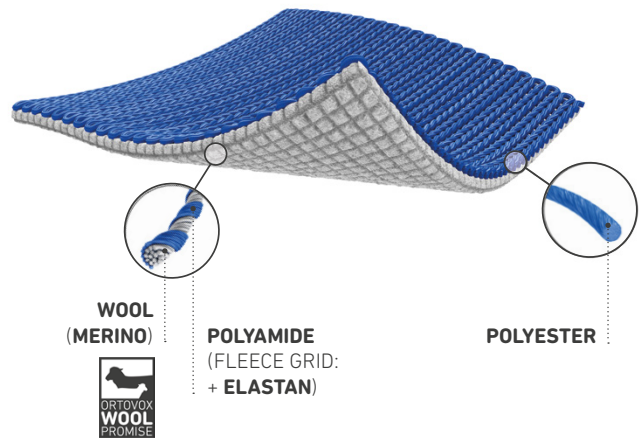

In the MERINO FLEECE line, ORTOVOX uses the finest merino wool on the inside together with polyester on the outside. What is special about the MERINO FLEECE LIGHT GRID is the waffle structure on the inside: This knit construction means the material is light and provides sufficient ventilation, while also providing high levels of insulation.

#### SPECIFICATIONS

Weight: 220 g/m<sup>2</sup> (FLEECE GRID)  
157 g/m<sup>2</sup> (FLEECE LIGHT GRID)

6 % elasthan	

1<sup>ST</sup>  
LAYER

## 150 MERINO COOL

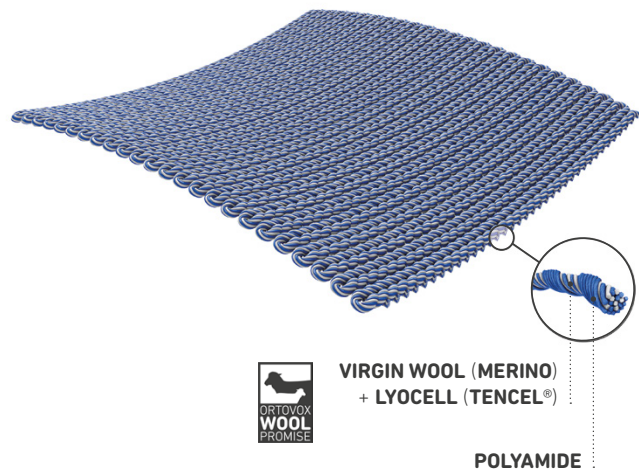

In the 150 MERINO COOL line, ORTOVOX combines Tencel® fibers, sourced from sustainable forestry, with merino wool. The wool fibers are characterized by great evaporative coolness and flat fiber surface – ensuring it cools automatically. An intricate spinning process makes the material mix robust and extremely functional. BETA-SPUN technology refers to a manufacturing process where fine polyamide fibers are spun around merino wool and Tencel®. This protective polyamide sheathing means the fabric is exceptionally scuff-resistant and robust – without sacrificing the benefits of merino fibers or the cooling Tencel® fibers.

#### SPECIFICATIONS

Weight: 150 g/m<sup>2</sup>

#### MATERIAL COMPOSITION

44 % virgin wool (MERINO)  
42 % lyocell (Tencel®)  
13 % polyamide

1<sup>ST</sup>  
LAYER

## 120 MERINO TEC

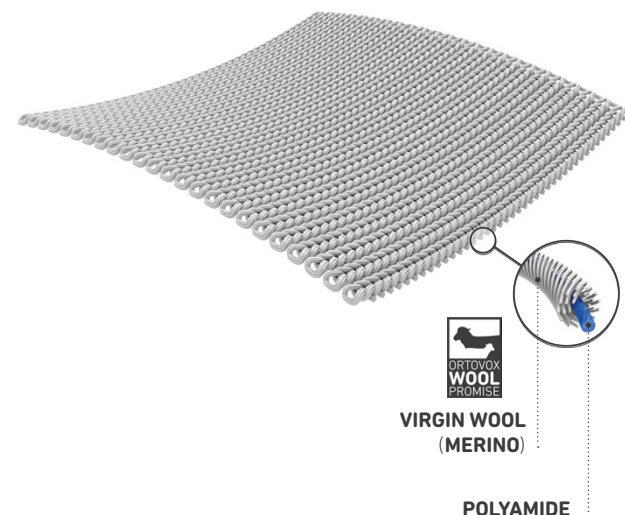

For the 120 MERINO TEC line, ORTOVOX uses a material mix made from 85% virgin wool (Merino) and 15% polyamide. The elaborate manufacturing process (CORESPUN technology by the Südvolle Group©) of this exclusive yarn make it so special: the finest Merino fibers are spun around a core of polyamide fibers. This spinning technique creates a yarn with a smooth fabric appearance and low volume. Thus a material that is extremely lightweight and elastic, yet extremely robust, durable and less susceptible to pilling at the same time can be produced. The 120 MERINO TEC LINE therefore combines the stability and durability of polyamide with the proven qualities of Merino wool.

#### SPECIFICATIONS

Weight: 120 g/m<sup>2</sup>

#### MATERIAL COMPOSITION

85 % virgin wool (MERINO)  
15 % polyamide

1<sup>ST</sup> LAYER

## MERINO COOL TEC

In the 120 MERINO COOL TEC line, the combination of fine Merino wool and the Tencel® fibers obtained from eucalyptus wood is even more durable, and maintains the same cooling effect: In a complicated process (CORESPUN Technology by © Südrolle Group), the fine Merino and Tencel® fibers are spun around a core of polyamide filaments. The resulting yarn is used to produce a material that has the same benefits as Merino wool and Tencel®, and is very robust.

### SPECIFICATIONS

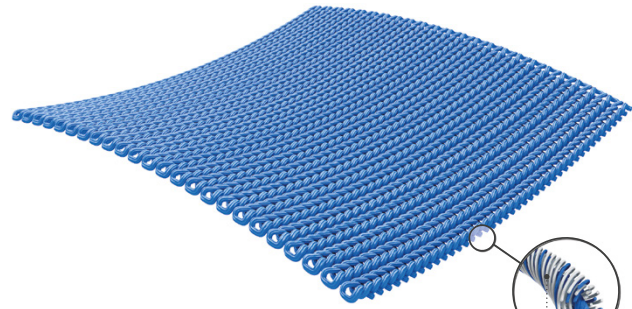

Weight: 120 g/m<sup>2</sup>

### MATERIAL COMPOSITION

52 % virgin wool (MERINO)

36 % lyocell (Tencel®)

12 % polyamide

1<sup>ST</sup> LAYER

## 120 MERINO COMPETITION LIGHT

The 120 MERINO COMPETITION is produced using an almost seamless circular knitting to place different material strengths at different areas of the body. The main zones are made from fine 120 g/m<sup>2</sup> MERINO, and particularly breathable mesh structures are used in spots that get more heated. Just like the 230 MERINO COMPETITION, the 120 MERINO COMPETITION is therefore one of the sportiest lines from ORTOVOX.

### SPECIFICATIONS

Weight: 120 g/m<sup>2</sup>

### MATERIAL COMPOSITION

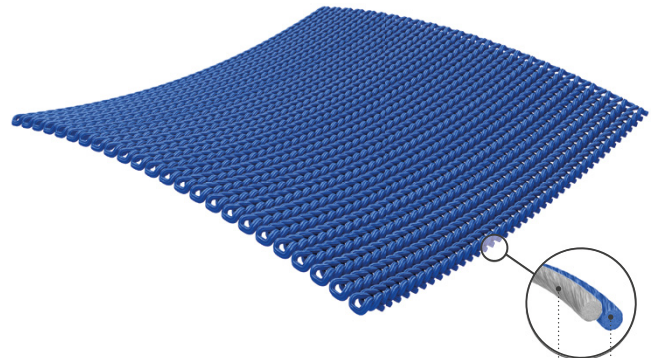

70 % virgin wool (MERINO)

30 % polyamide

## 185 MERINO

The 185 MERINO line, made from 100% pure Tasmanian Merino wool, regulates moisture and temperature levels, is soft, easy to care for and odor neutralizing. With a volume of 185 g/m<sup>2</sup>, the material covers a broad temperature range and is therefore perfect for use the whole year round. The fiber diameter of 19 microns feels extremely soft on the skin and yet is still durable enough to conquer the very highest summits.

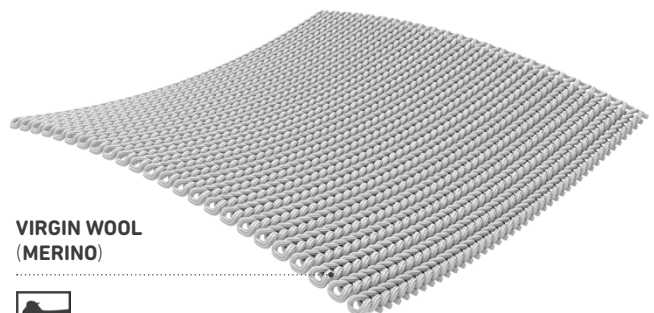

### SPECIFICATIONS

Weight: 185 g/m<sup>2</sup>

### MATERIAL COMPOSITION

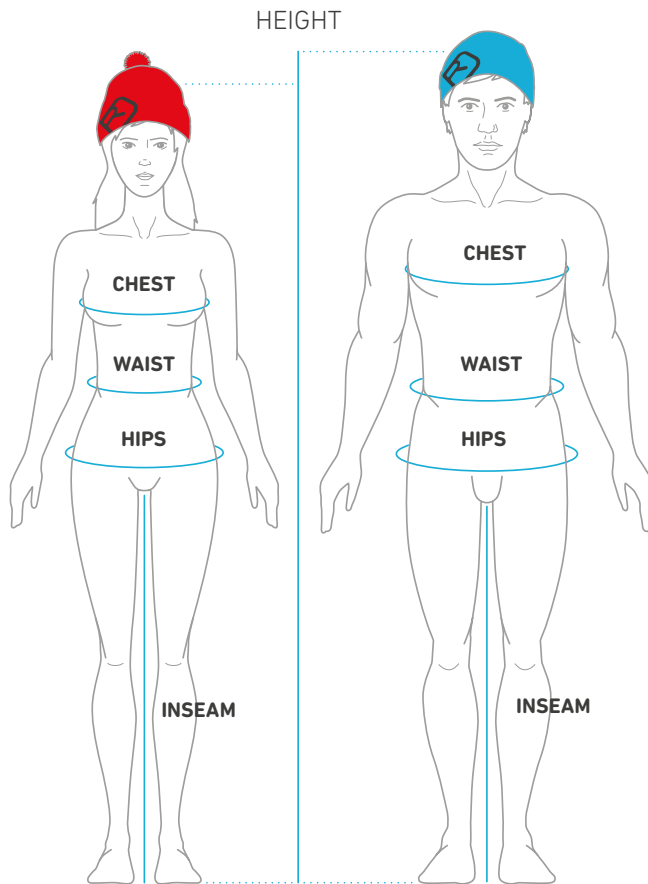

100 % virgin wool (MERINO) from Tasmania

VIRGIN WOOL  
(MERINO)

# SIZE CHART

## HOW DO I MEASURE CORRECTLY?

### 1. CHEST MEASUREMENT

Horizontally at the most prominent part of the chest.

### 2. WAIST MEASUREMENT

Horizontally at the narrowest part of the body.

### 3. HIP MEASUREMENT

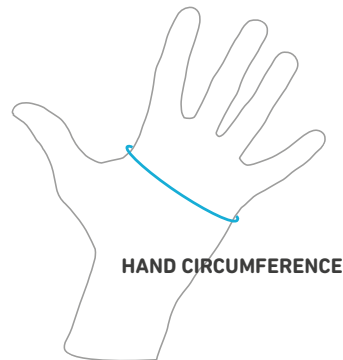

Loosely and horizontally at the broadest part of the hips.

### 4. INSEAM

Standing up, measure the distance from the crotch to the floor (barefoot).

### 5. HAND CIRCUMFERENCE

Wrap the measuring tape loosely around the broadest part of the middle of an open hand (not including the thumb).

# LEG LENGTH AND FIT

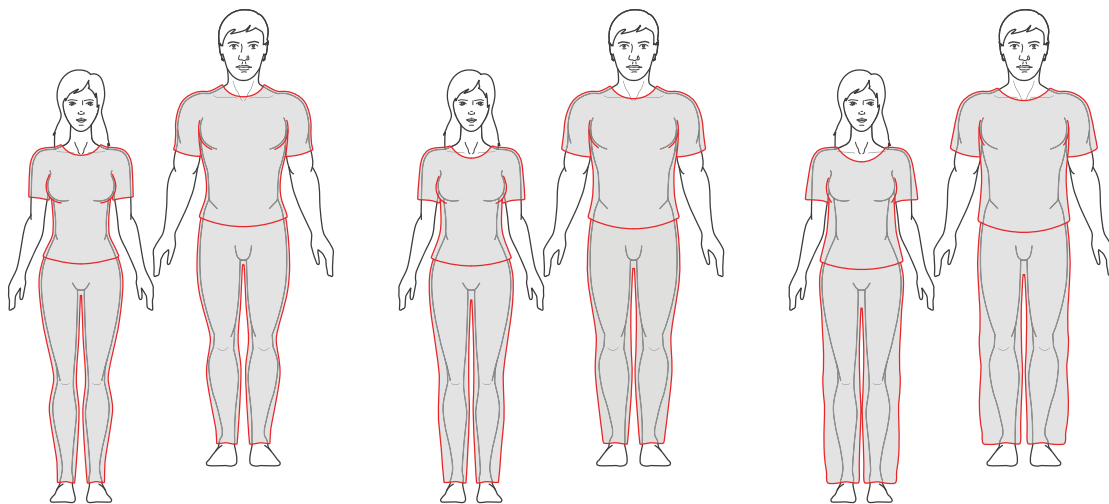

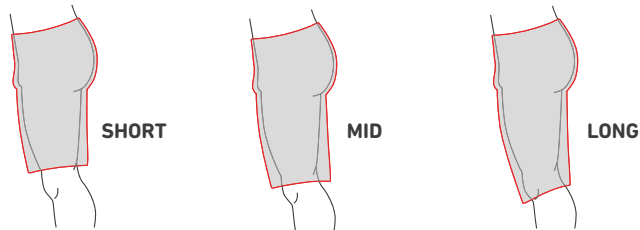

## WOMEN SHORTS

Each ORTOVOX product has been designed for its own target group and type of use. Our **PANTS** can be divided into three different **FITS** depending upon the activity. Our **SHORTS** offer three different **LEG LENGTHS** for optimum comfort.

ATTENTION: lengths can vary from person to person depending on height and fit. The representations here are a rough guide.

## MEN SHORTS

ATHLETIC FIT

REGULAR FIT

LOOSE FIT

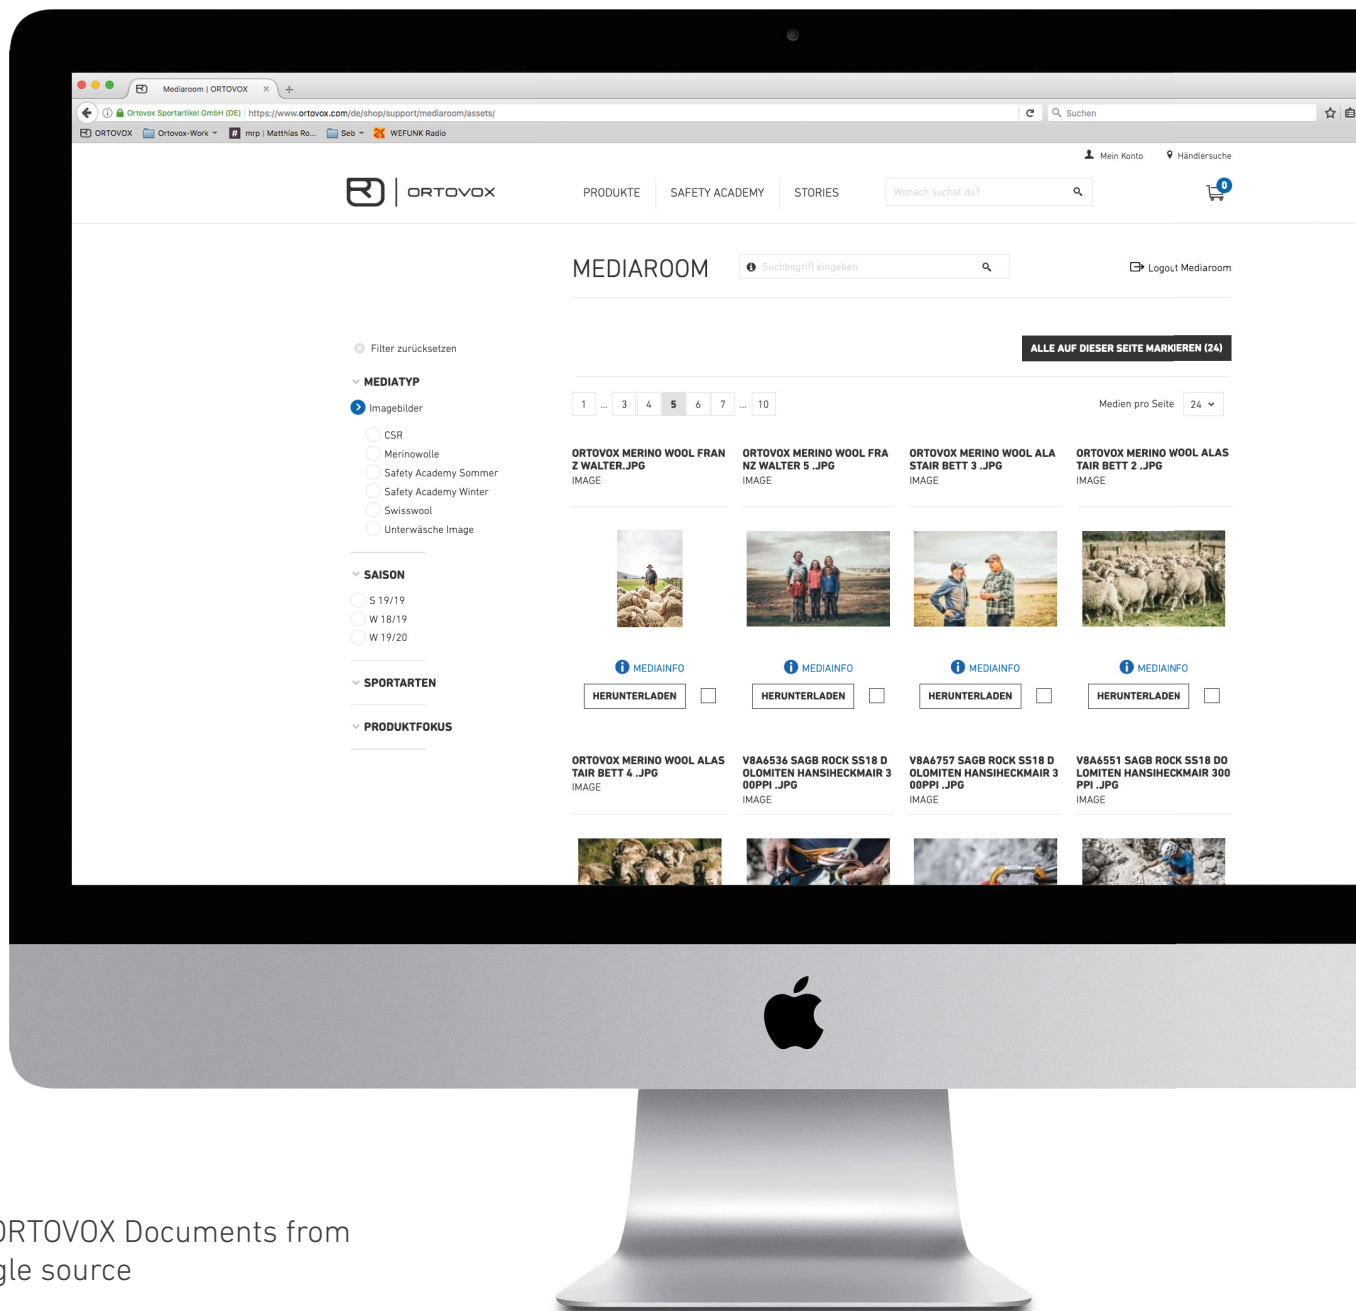

Athletic fit is a **SPORTY CUT** that **HUGS THE BODY**. The pants are tight-fitting at the thighs and calves. In combination with the elastic materials, the cut provides an optimum, well-defined fit with sufficient freedom of movement.

Regular fit refers to a "**NORMAL**" **FIT**. Regular fit is a standard cut and is neither tight-fitting nor wide. This classic fit is in between athletic fit and loose fit.

Loose fit is a **LIGHT, CASUAL FIT**. The pant legs are cut wider than regular fit and the crotch is lower. This means the pants are loose and provide lots of **FREEDOM OF MOVEMENT**.

# MEDIAROOM

ALL ORTOVOX Documents from  
a single source

Our new **MEDIA ROOM** makes it easy for you to find  
and download all relevant data about our brand and  
our products:

## THANK YOU, TEAM

There are things that can only be accomplished as a team. Corona what wool – we can depend on you!

... **THANKS TO** ...

... **THE MARKETING-TEAM**, to get this wonderful workbook completed, despite all external influences.

... **OUR TASMANIAN MERINO SHEEP**, for their fluffy wool.

... **THE BOB BROWN FOUNDATION**, for their fight to save one of the last wild places on earth: Tarkine / takayna rainforest..

... **MATTHIAS, FABIO, MARLIES, ANDI, FRANZI** and **CHRIS**, without you our workbook wouldn't be half as beautiful.

... **HANSI**, who is doing (almost) anything for the perfect picture.

... **HANSI, MARLIES, ANDI** and **FRANKI**, for all their commitment, also above 3,000 m and the impressive pictures from the Valais Alps.

... **SISSI**, for swift fingers and for keeping a cool head, also when mails were coming from all sites.

... **MATTHIAS**, for the first-class product photos, much patience and the non-stop operation of the coffee machine.

... **BENE** and **KATI** from F&W, for their understanding to not realize a printed version of the workbook.

... **OUR PRODUCT MANAGERS**, who have once again conjured up outstanding pieces.

... **CHRISTIAN**, to guide us through stormy times safely.

... **THE SEBASTIAN(S)**, who finished the workbook from "the home office" aka basement.
